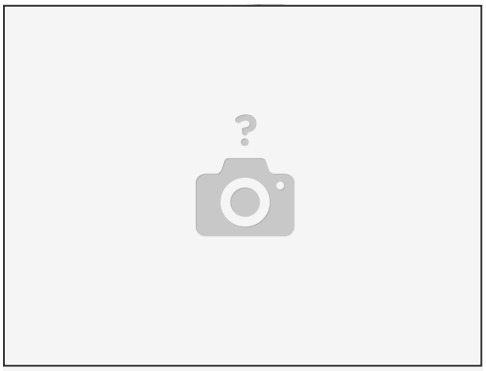
# 03- Connecting Scanner

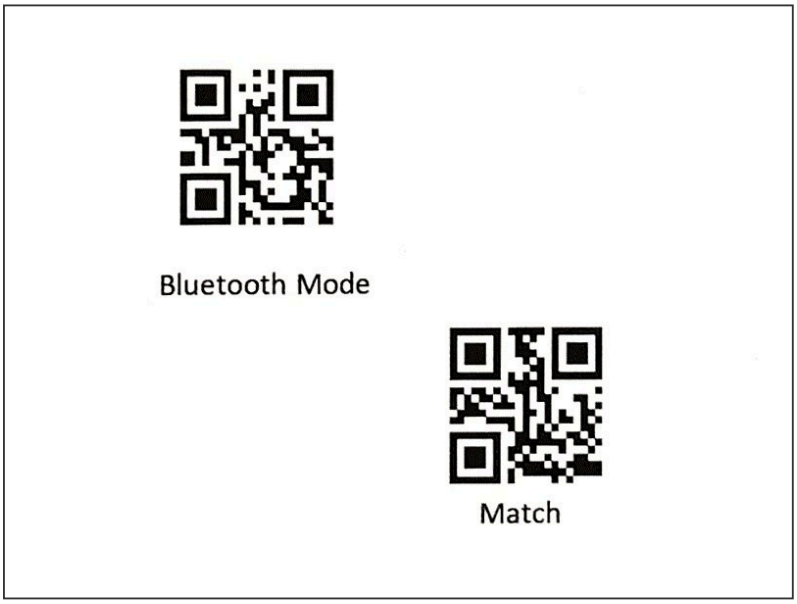
Written By: Eric Sutter

## Step 1 — Choose Connection Type



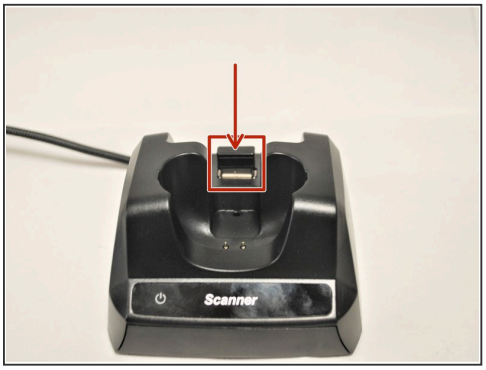
- You may connect the scanner to a device in three different ways:
  - To connect the canner via Bluetooth, click HERE
  - To connect the canner via USB Dongle, click HERE
  - To connect the canner via USB Cable, click HERE

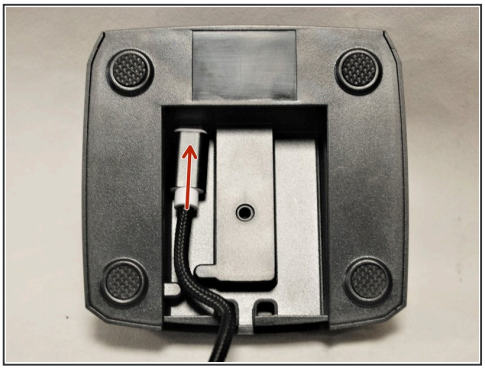
## Step 2 — Connecting Scanner via Bluetooth

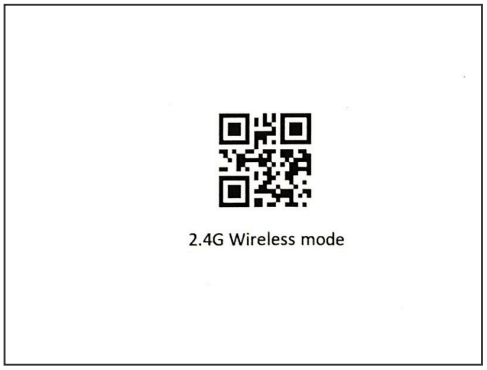


- Scan the 'Bluetooth Mode' barcode in Image 1
- Scan the 'Match' barcode in Image 1
- The scanner will blink blue if it is attempting to pair
- On your device you are connecting the scanner to, open Bluetooth settings and add a device
- Select the 'ScannerHID' device
- Press the scan key to begin scanning!

## Step 3 — Connecting Scanner via Dongle







- Plug the USB Dongle into the Cradle, if it is not already
- Plug the USB end of the USB Cable into your device
- Plug the Micro USB end of the USB Cable into the bottom of the Cradle
- Dock the Scanner into the Cradle
- Remove it then scan the barcode in Image 3
- Press the scan key to begin scanning!

## Step 4 — Connecting Scanner via Cable

- Plug the USB end of the USB Cable into your device
- Plug the Micro USB end of the USB Cable into the Bluetooth Scanner
- Press the scan key to begin scanning!
