Import Display Units from another project

Learn how to import display unit and decimal place settings from another project you have access to within your organization.

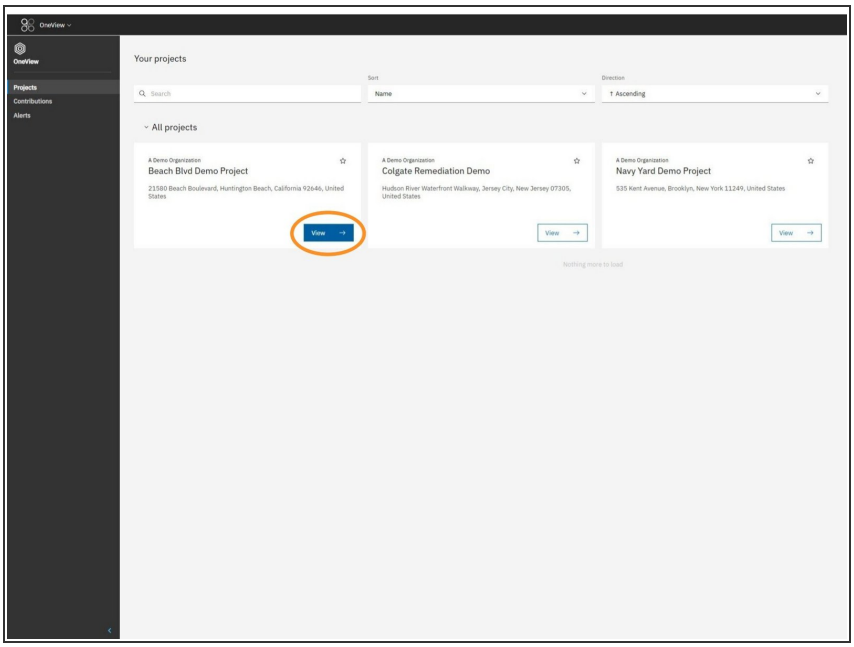

Written By: Jason

INTRODUCTION

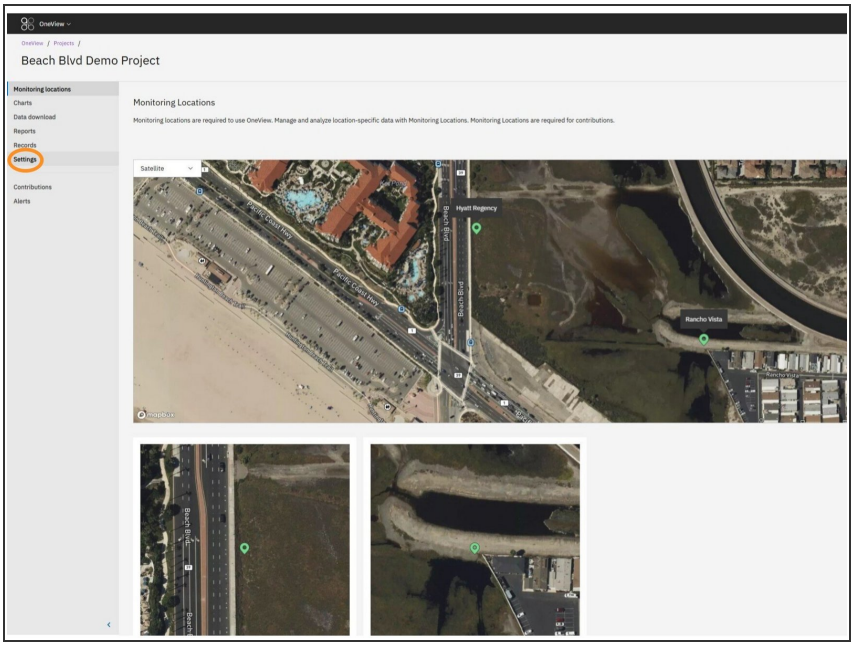

To save time and ensure consistency across projects, OneView allows you to import display unit settings from any project you have visibility of within your organization. This feature is especially useful when managing multiple similar projects or when aligning formatting for reporting purposes. In this guide, you'll learn how to import these settings step-by-step using the display settings table.

Step 1 — Open your project

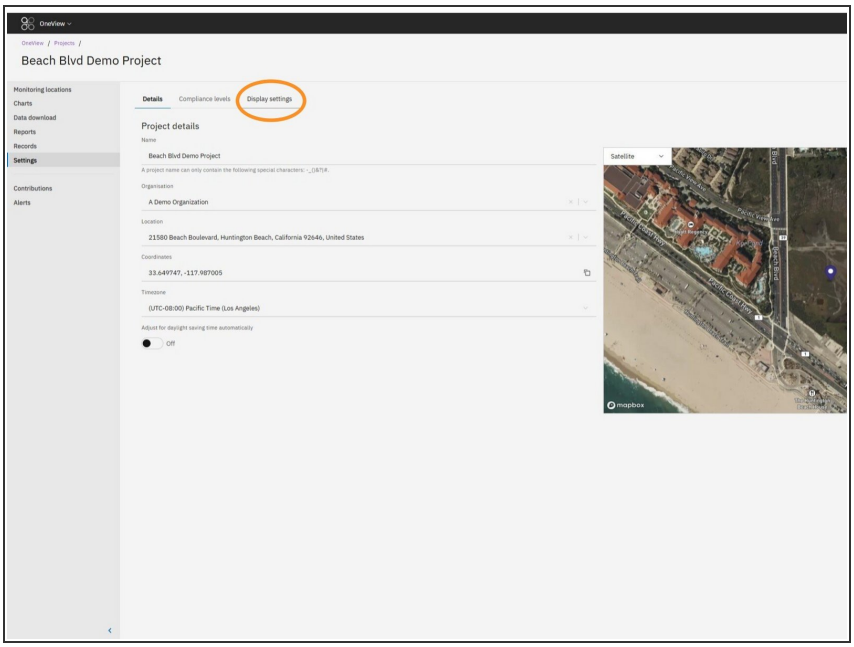

- From the **Projects** screen, locate the project you want to work on.
- Click the **View** button on the project card (e.g., Beach Blvd Demo Project).

Step 2 — Click "Settings"

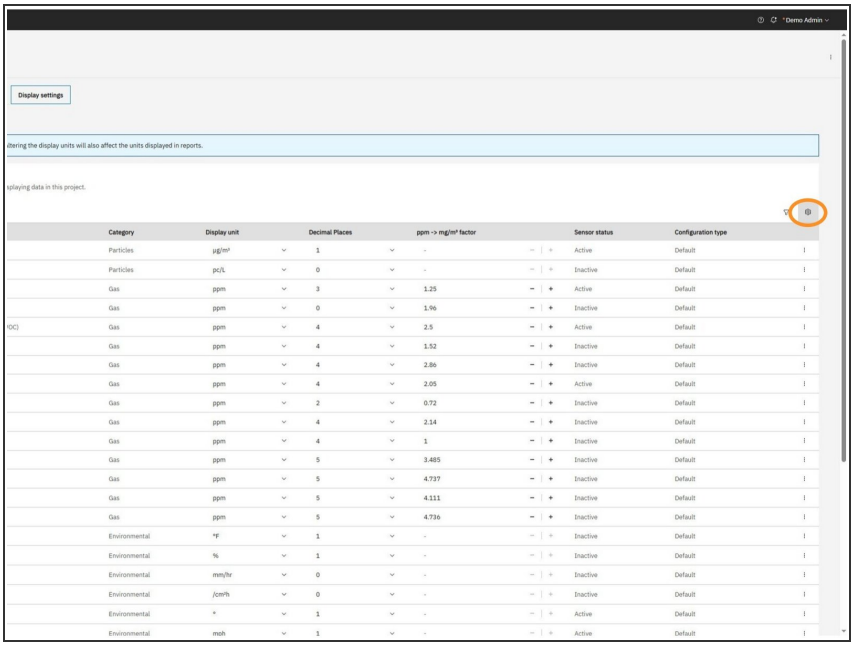

- From the side navigation menu, click **Settings**.

Step 3 — Click "Display Settings"

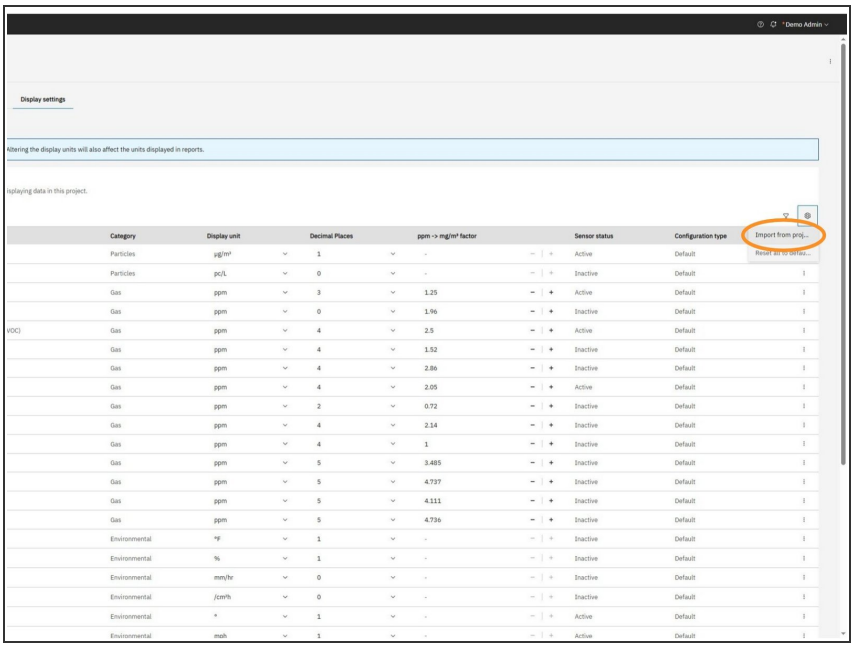

- From the top navigation tabs, click on **Display Settings**.

Step 4 — Open the Display Units menu

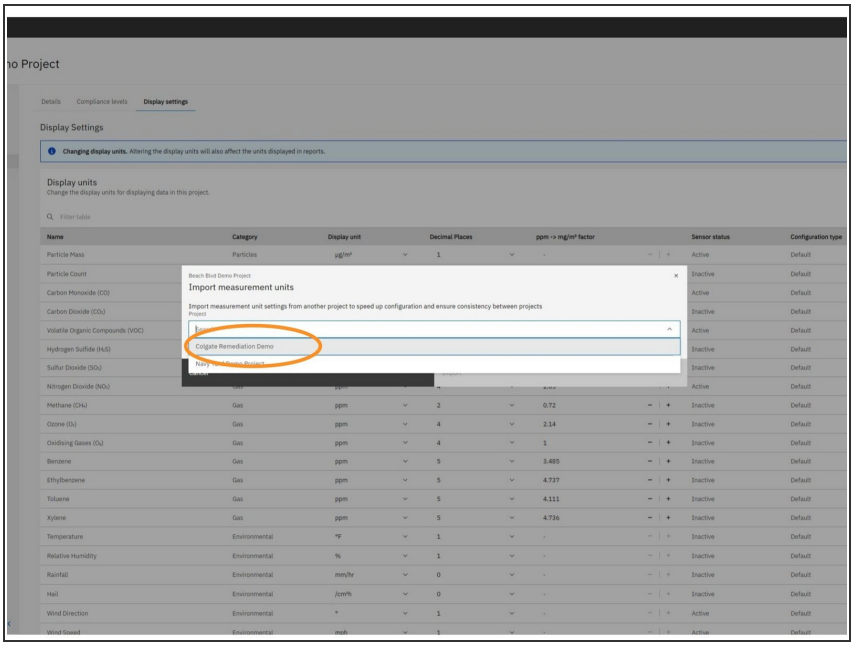

- In the **Display Units** table, click the **settings cog** icon located at the top right corner of the table.
- This will open a dropdown menu with additional display units options.

Step 5 — Select "Import from project"

- From the dropdown menu, click **Import from project**.
- This will open a modal allowing you to select another project within your organization to copy display unit settings from.

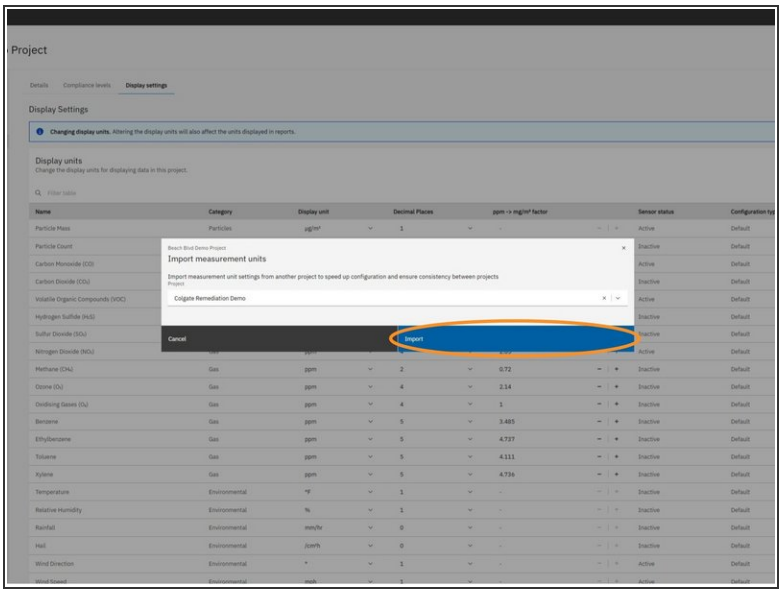

Step 6 — Choose a project to import from

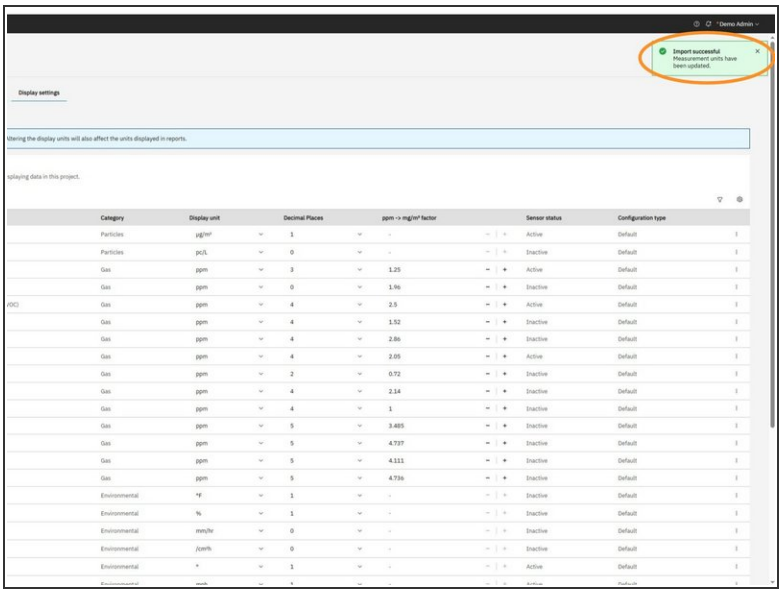

- In the modal, click the **dropdown menu** to view a list of projects you have access to (i.e. visibility of) within your organization.
- Select the project whose display unit settings you want to import.
- These settings will be copied into the current project, replacing any existing customizations.

This document was generated on 2025-05-21 09:55:28 AM (MST).

Step 7 — Confirm and import settings

- After selecting the desired project, click the **Import** button in the modal.
- This will apply the display unit settings from the selected project to your current project and close the modal.
- A confirmation toast will appear indicating the import was successful.
