INTRODUCTION

Version 2 of our popular edge lit Acrylic LED Name Badge.

This is an inexpensive, quick, and fun way to make a light up name badge. Just etch your name onto an acrylic blank using a safety pin, insert an LED & battery in, and show off!

We've also got a LED Paper Name Tags that are a great paper circuits activity!

If you want to laser cut your own blanks out visit our GitHub Repo.

PARTS:

- LED Name Badge Kit (1)
