Day 3: Conductors and Insulators

View the circuit from Day 2 in a new way. Assemble and use a second circuit to test materials for their properties as conductors or insulators.

Written By: Andy Wallus

INTRODUCTION

View the circuit from Day 2 in a new way. Assemble and use a second circuit to test materials for their properties as conductors or insulators.

TOOLS:

- Scissors (1)

PARTS:

- Crazy Circuits Classrooms: Circuits 101 (1)

Students will now understand that electricity does not travel through all materials equally. They should also be able to recognize, name and classify materials by their relationship with electricity as either Conductors or Insulators.
