Molded LEDs Activity eBook

Download our Molded LEDs Activity eBook

Written By: Pete Prodoehl

INTRODUCTION

What *are* molded LEDs & what can you do with them?

Molded LEDs are just plain-old LEDs encased in a hardened liquid that allows light to pass through to a degree. We use silicone molds in different shapes and hot glue; making the ordinary...extraordinary!

Skulls, pumpkins, ghosts, hearts...the sky is the limit! Molding LEDs is an easy and inexpensive way to jazz up just about any circuit.

TOOLS:

- Hot Glue Gun (1)
- Scissors (1)
- Halloween Silicone Molds (1)

PARTS:

- Paper Circuits Kit (1)

Step 1 — Download PDF

- This free 17 page eBook covers the basics of creating molded LEDs you can incorporate into your circuits projects.
- Just scroll to the bottom of the page to view the PDF in the **Attached Documents** section.
