

Day 5: Switch it Up!

Add switches of 2 different kinds to existing assemblies using kit parts. Observe and record what they do and what their characteristics are.

Written By: Andy Wallus

INTRODUCTION

Add switches of 2 different kinds to existing assemblies using kit parts. Observe and record what they do and what their characteristics are.

TOOLS:

- [Scissors](#) (1)

PARTS:

- [Crazy Circuits Classrooms: Circuits 101](#) (1)

Students now begin to add control elements to what they should already be a familiar circuit arrangement. They should now be able to assemble a circuit using switches of two different types to control lights in different ways (building upon their relationship between this common component and Open vs Closed circuit states) .
