Step 1 — Print the Template & Gather Supplies

- If you haven't built the Tank's Main Body yet, see the Rover Tank Body guide first
- Print the template of your choice.
  - We've included both templates in the single PDF file attached to this guide.
- You will also need scissors, a hole punch, 4x LEGO pins (black) and 4x LEGO round beams (grey), and double-sided tape or glue.

Step 2 — Color and/or Cut out The Template

- If you chose the "Print and Color" template, color it in first, then cut it out.
  - Or, If you chose to print the "Print and Color" template on colored paper, cut out the pieces and tape them in place.
- If you chose the grey "printable" template, cut out the template as shown.

Step 3 — Punch Holes Where Shown

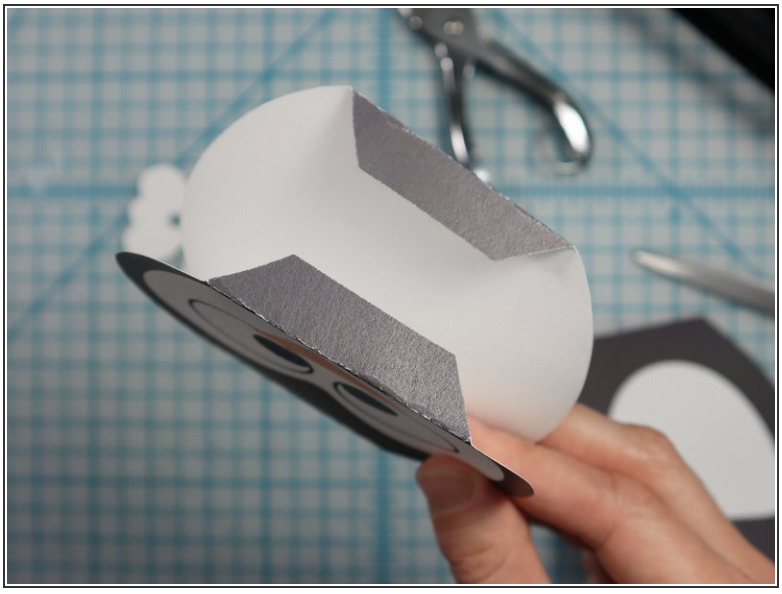

- Use a standard hole punch to punch out the circled where shown.

Step 4 — Fold the Paper Cutouts

- Fold along the dotted lines as shown.

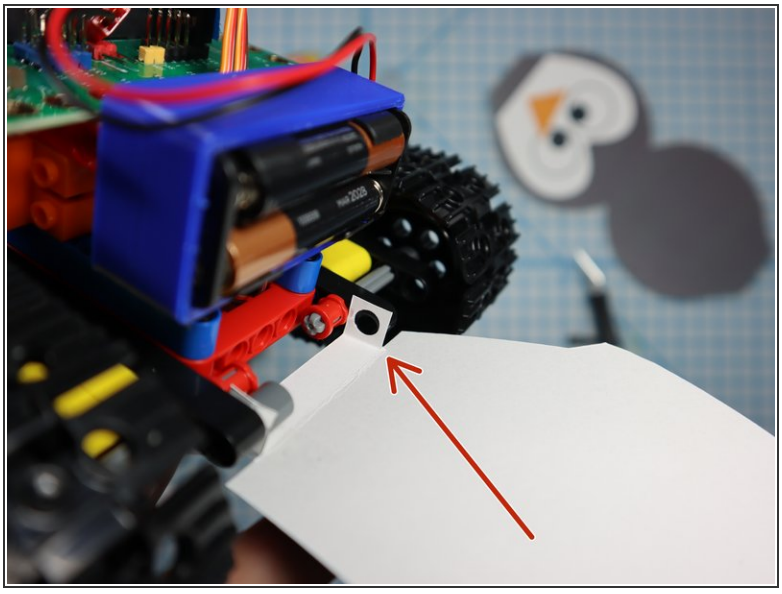

Step 5 — Prepare the LEGO Pins

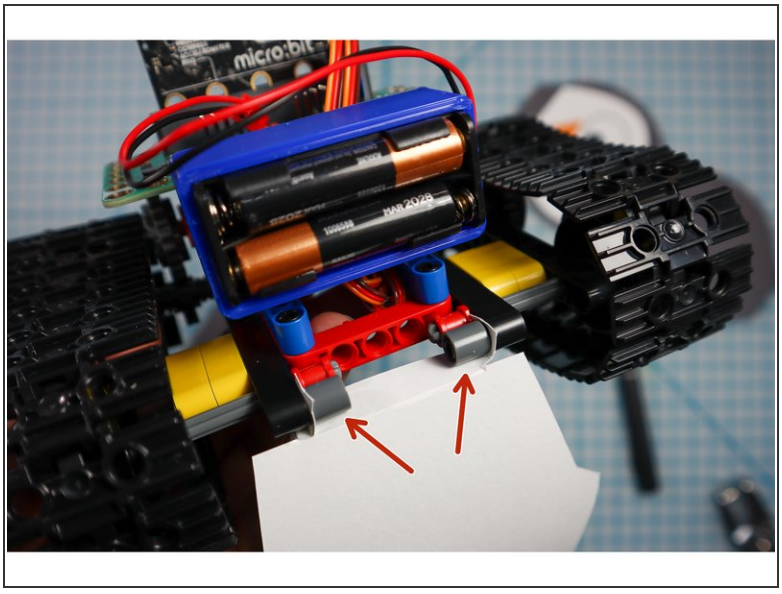

- Connect each LEGO pin to a LEGO round beam as shown.

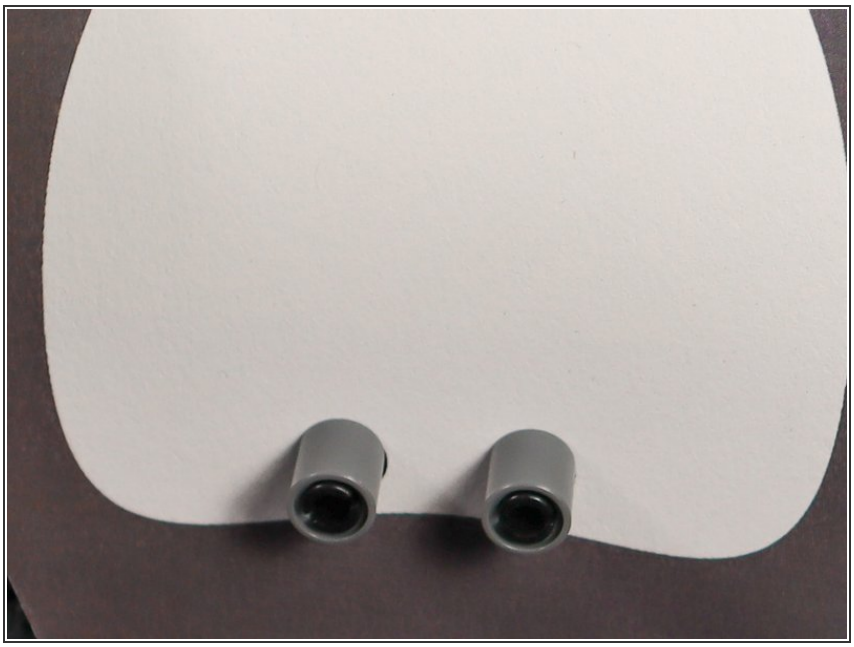

Step 6 — Use LEGO To Secure the Penguin Back

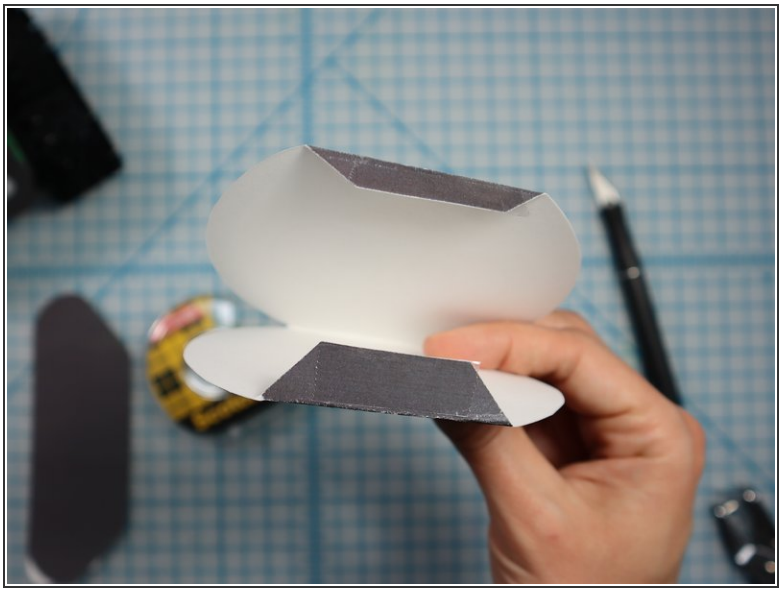

- Place the folded paper between beams on the back of the Tank as shown.
- Use two pin/beam sets to connect the back of the penguin body to the Tank as shown.

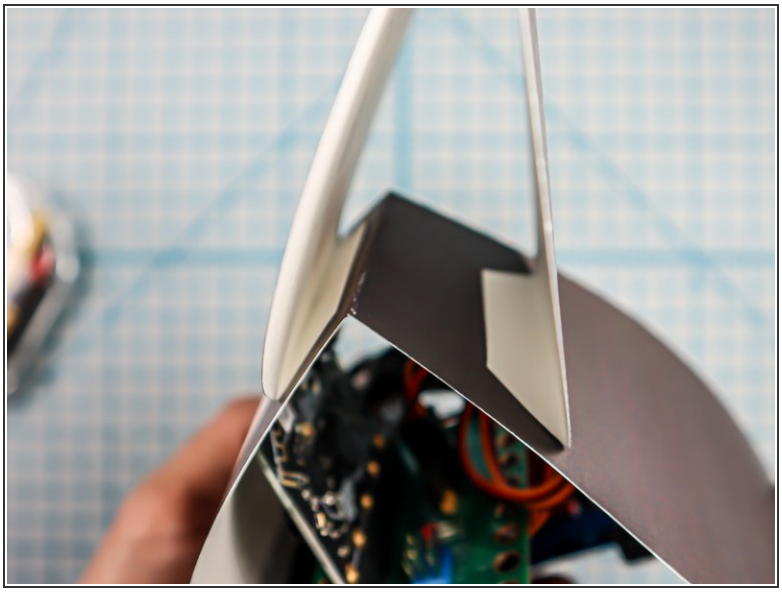

Step 7 — Secure the Front

- Use two more pin/beam sets to attach the front of the penguin body to the front of the Tank as shown.

Step 8 — Add the Head

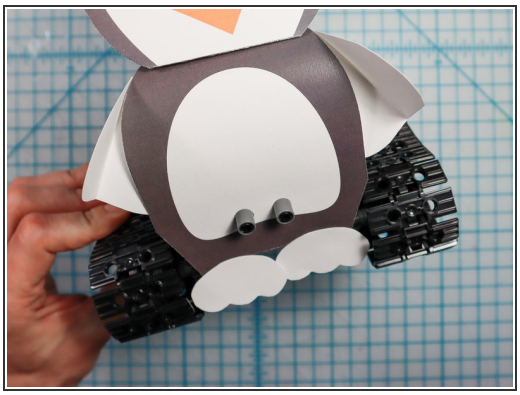

- Stick double-sided tape or glue to the bottom of the head flaps.
- Adhere the head to the body as shown.

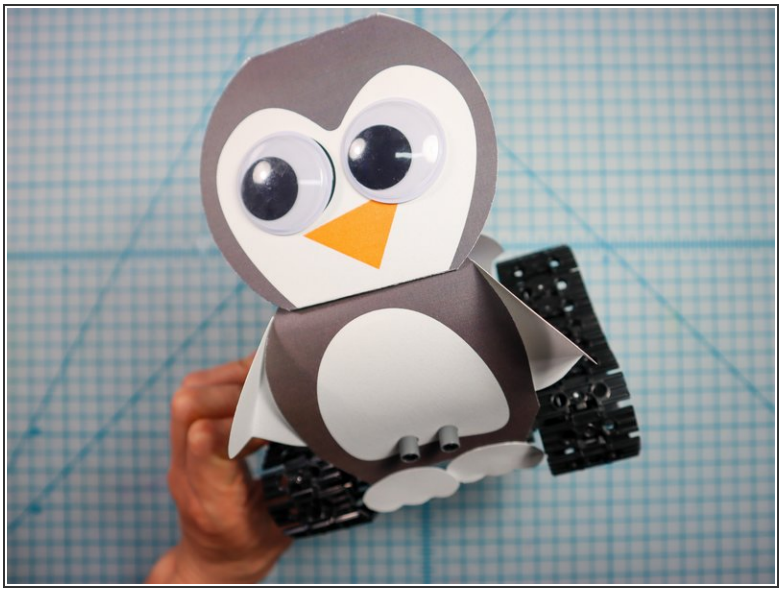

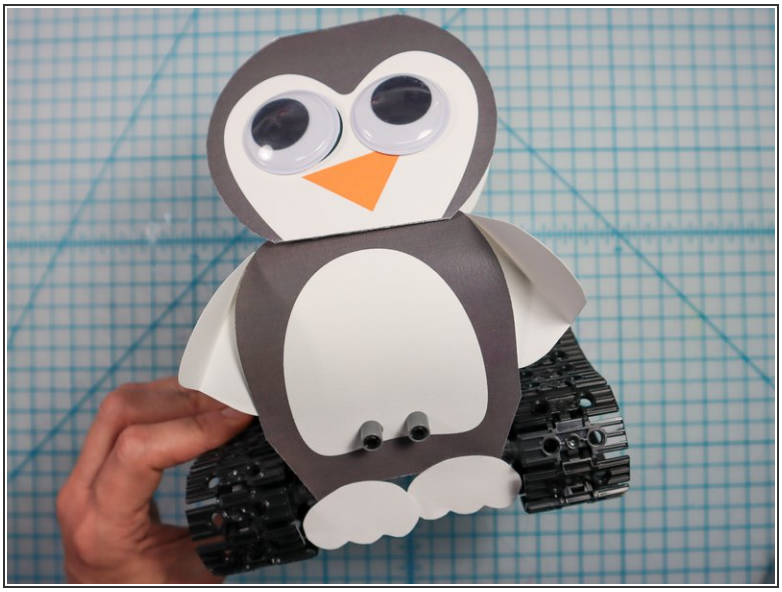

Step 9 — Attach the Wings and Feet

- Fold the wings along the dotted line.
- Add double-sided tape or a dot of glue to the center of the inside of the wings.
- Thread the wings behind the penguin's body and squeeze the spot with the tape/glue to keep them in place.
- Add double-sided tape or a dot of glue to each foot and glue them in place.

Step 10 — Optional: Add Googly Eyes!

- The penguin's eyes are 1.5-inch circles - perfect for a set of Googly Eyes! Add them if you wish.
