Light-Up Unicorn Mask

Make a light-up unicorn mask with this free template. It's the perfect art and technology wearable project for Halloween, a costume party, or just because!

Written By: Natasha Dzurny

INTRODUCTION

Make and customize your own Light-Up Unicorn Mask with this template. This guide is an overview of this design. For a more detailed circuit tutorial, see the Light-Up Spider Mask Guide.

If you like this mask, check out these other designs:

- Alien
- Cat
- Spider

You can make this project (and many more!) with our **Paper Circuits Kit**.

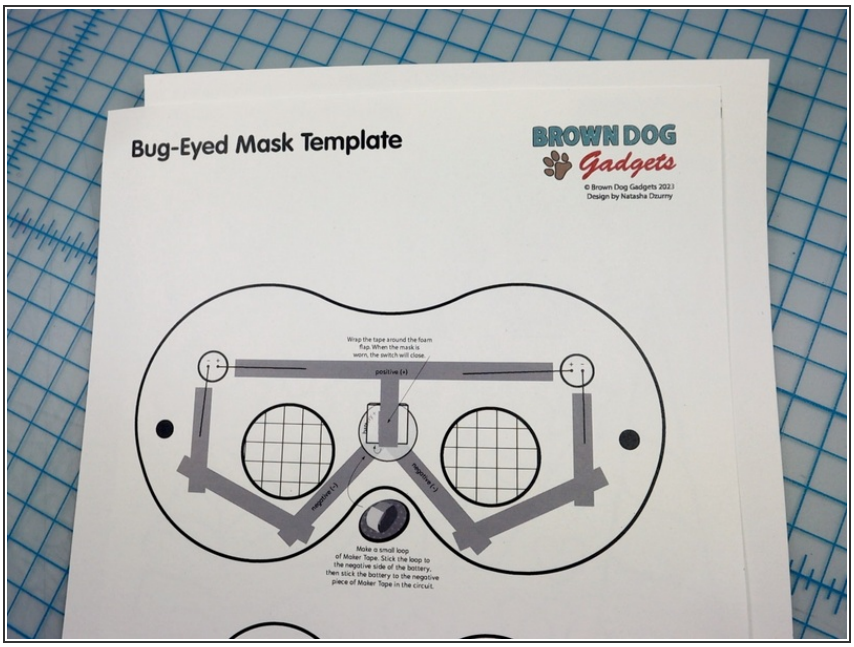

TOOLS:

- Printer (1)
- Scissors (1)
- X-ACTO Knife (1)
- Push Pin (1)

PARTS:

- Paper Circuits Kit (1)
- Cardstock (1)
- Ribbon (1)
- Glue Stick (1)

Step 1 — Print the Template

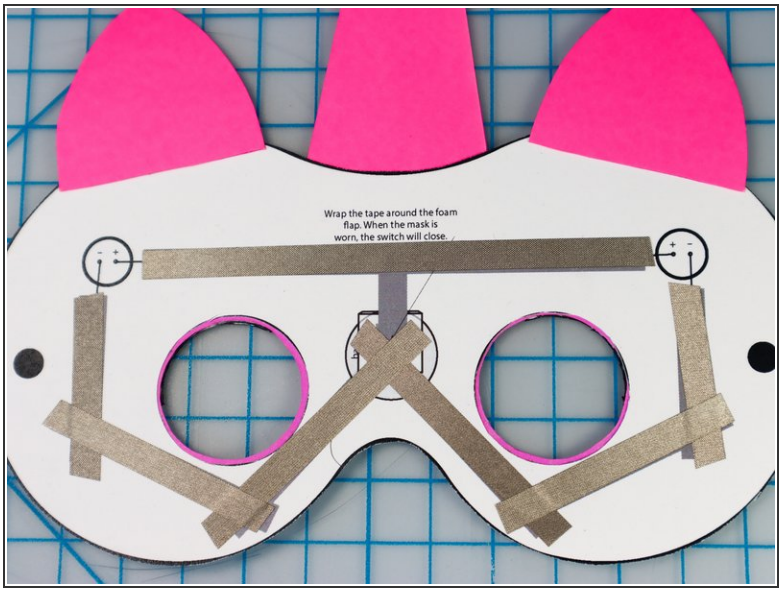

- Print out the Bug-Eyed Mask Template to use as a base for the Unicorn design.
- This guide is an overview of this design. For a more detailed circuit tutorial, see the Light-Up Spider Mask Guide.

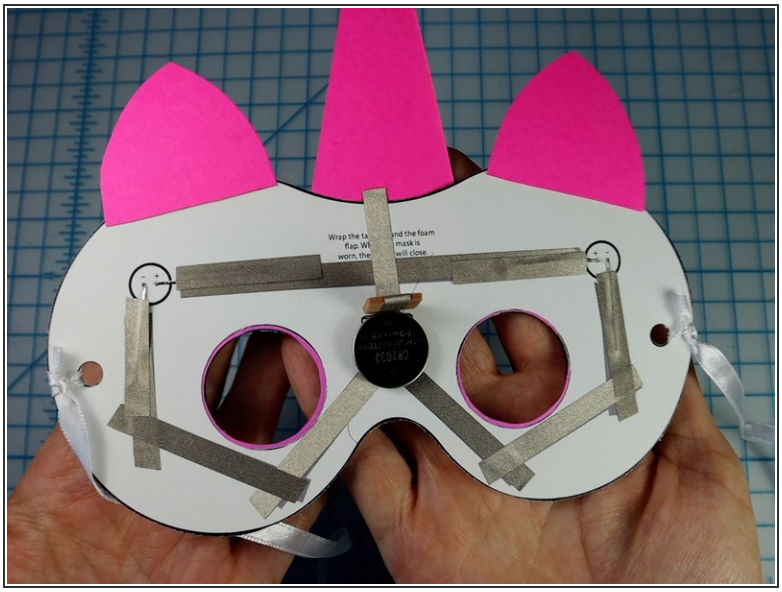

Step 2 — Cut and Glue together the Paper Shapes

- Cut out the template.
- Use the unicorn horn and ear templates from the Embellishments sheet to cut the shapes out of paper.
  - *Tip: Choose one color to be the base color, and cut out the exterior shapes of the ears and horn. Then cut out the interior shapes from a contrasting color and glue them on top of the base color shapes.*
- Cut out the eye shapes and glue them in place.

Step 3 — Add the Circuit

- Follow the instructions on the template to add the circuit to the back.

Step 4 — Add Ribbon

- Add ribbon to the sides as shown.
  - *Add any extra embellishments like flowers or eyelashes. We made some eyelashes out of black paper to add some pizzazz.*

Step 5 — Wear the Mask!

- Time to wear your mask and light the night!
