

CH17-B - Single CC NeoPixel ROYGBIVPWB

Connect a Crazy Circuits NeoPixel to a Bit Board and control it with code.

Written By: Pete Prodoehl

INTRODUCTION

Connect a Crazy Circuits NeoPixel to a Bit Board and control it with code.

We'll explore how to control an RGB LED (a "NeoPixel") for a bit more color from our LEDs.

TOOLS:

- [Computer](#) (1)
- [Scissors](#) (1)

PARTS:

- [Crazy Circuits Bit Board](#) (1)
- [micro:bit](#) (1)
- [Maker Tape](#) (1)
1/8" Wide
- [NeoPixel Chip](#) (1)

Step 1 — Connect the NeoPixel

- We'll use **Maker Tape** to connect the NeoPixel to the Bit Board on a LEGO baseplate.
- To connect the NeoPixel, one side goes to **Ground** (GND) and the other side to **3.3v**
- We'll then connect the center pin labeled **DI** (for **D**igital **I**ntput) to **Pin 0**, which will control the NeoPixel.
 - A NeoPixel is a "Smart LED" which is actually three LEDs (a red, green, and blue LED).
- ☑ You'll notice the **Ground** on the Bit Board (as well as the NeoPixel and other Crazy Circuits components we'll use) is color coded **White**.
- ☑ The **3.3v** hole on the Bit Board is labeled and is actually two holes right next to each other on the Bit Board. (There is a small line showing the connection between them.)

Step 2 — Load the Code

- If you've never used a micro:bit before you'll want to check out this guide: [Bit Board V2 Setup and Use](#)
- We're going to load the following code for our **NeoPixel ROYGBIVPWB** program: https://makecode.microbit.org/_99bLT5gvm...
- After setting up our NeoPixel we'll go through all of the listed colors; red, orange, yellow, green, blue, indigo, violet, and then purple, white, and black (which is off!)

Step 3 — Test it Out!

- Once the code is loaded it should start running immediately.
- ① You can power the micro:bit via the USB cable you used to load the code or you can use a battery pack plugged into the Bit Board.
- You'll see the NeoPixel cycle through red, orange, yellow, green, blue, indigo, violet, then purple, white and black. (Black is off!)

Step 4 — Follow Along

- Follow along with our recorded Live Stream!
- ⓘ You can watch the full video of us walking through this project, along with explaining and exploring the code:
