Who's Afraid of the Light - Bioluminescence

Who’s Afraid of the Light? by Anna McGregor is a great read-aloud to help teach about ocean animals and bioluminescence in the classroom.

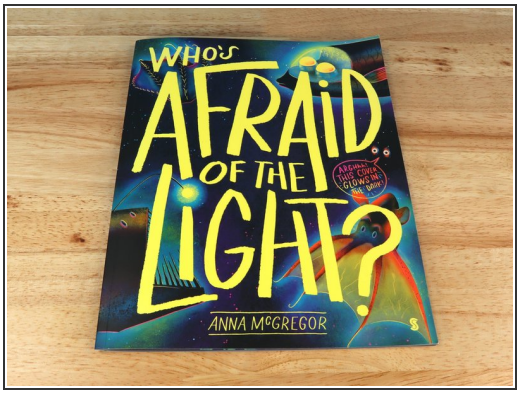

Written By: Amanda Etim

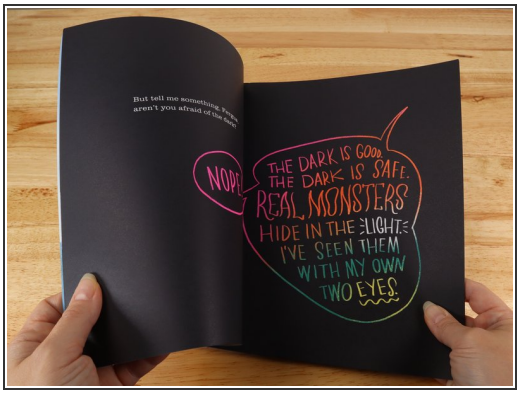

INTRODUCTION

Who’s Afraid of the Light? by Anna McGregor is a great read-aloud to help teach about ocean animals and bioluminescence in the classroom. Below you will find suggestions for projects that pair well with the book. If you'd like your own copy of the book, you can purchase it directly from the publisher or from Amazon.

Step 1 — Book Overview

- Fergus lives down in the deepest, darkest depths of the sea and is scared of just one thing … the light! Come on a trip to the deepest, darkest depths of the ocean. There are many fascinating creatures that call it home. There's nothing to be afraid of … … is there?
- Anna McGregor introduces young readers to the wonders of the ocean's 'midnight zone', where no sunlight at all is able to penetrate. We meet Fergus as he hides from a parade of sea creatures that use bioluminescence to find their way in the dark. At least, we think he is hiding … or is it something else entirely?

Step 2 — Projects

- Here are a few projects that can be completed in connection with this book:
  - Animal Friends - Anglerfish
  - Solar Sea Creatures
  - Cephalopod
  - Laser Shark Card
