01_Upgrade Duet2WiFi Firmware

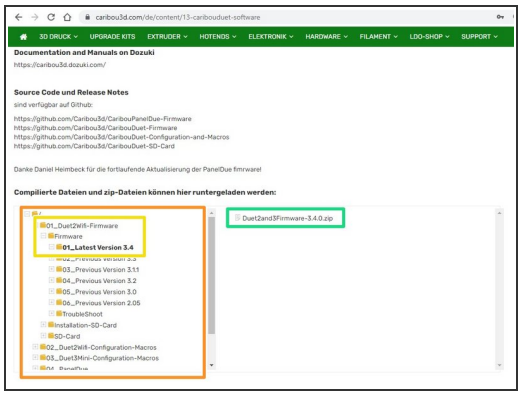

Written By: Caribou3d

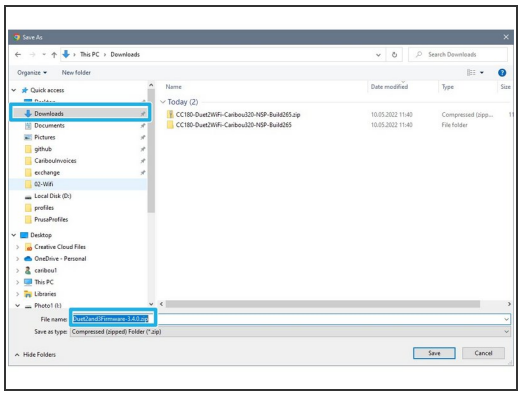

This document was generated on 2022-06-24 02:03:28 PM (MST).

Step 1 — Check current Version and Download Firmware

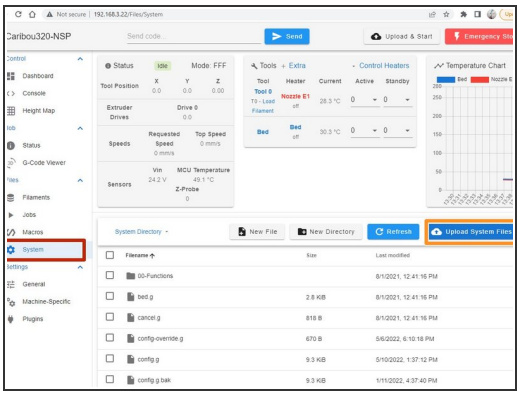

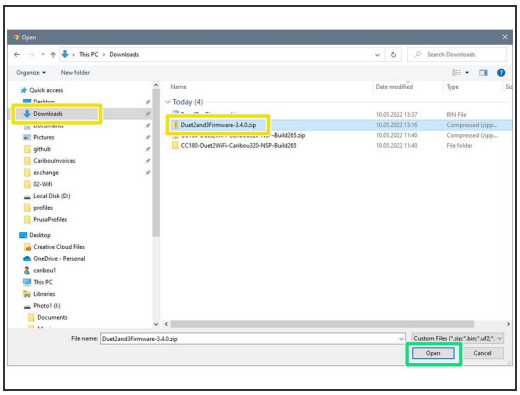

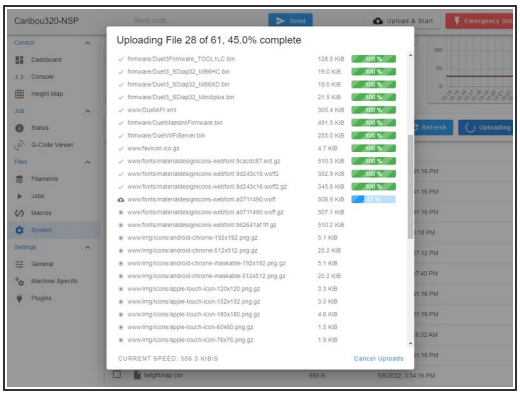

- Under **Machine-Specific** you can check the currently installed version.
- Go to the [CaribouDuet Software page](caribou3d.dozuki.com/de/content/13-caribouduet-software).
  - In the File Manager of the page, click:
    - ***01_Duet2Wifi-Firmware / Firmware /
    - Check if there is a more recent version available.
    - Download the .zip file by clicking on it.
    - Save the file in a directory of your choice.

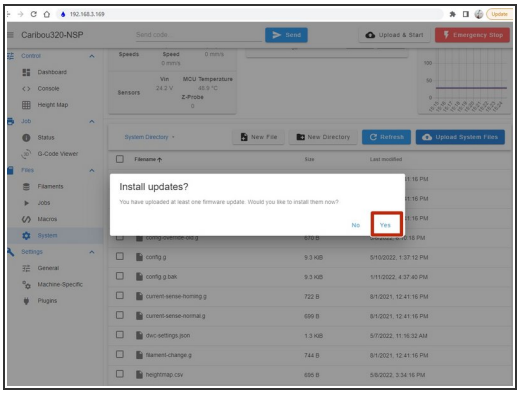

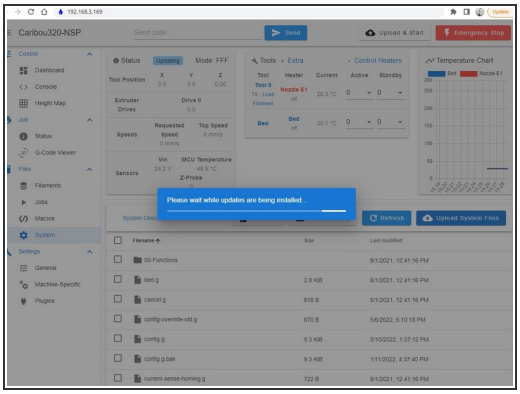

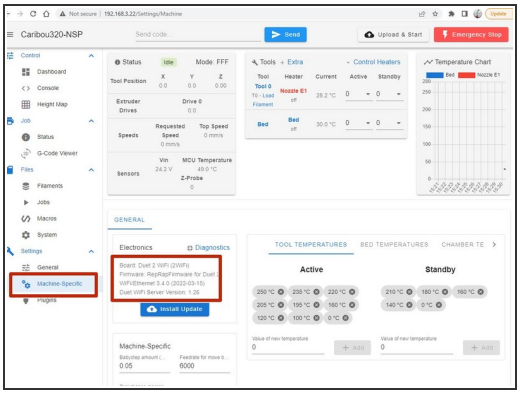

Step 2 — Installing the Duet firmware (1 / 2)

- In Duet WebControl, select **System**.
- Click there on **Upload System Files**.
- A window opens and you select the file **Duet2and3Firmware-x.x.x.zip** there.
- Click on **open**.

ⓘ The firmware will now be unpacked automatically.

Step 3 — Installing the Duet firmware (2 / 2)

- A window will open, click **yes** there to start the installation.

ⓘ The firmware will now be installed. The process can take up to 60sec and in the meantime the connection is interrupted and automatically restored.

- Under **Machine-Specific** you can check the currently installed version.
