Yamaha YFZ450R/YFZ450X (STAGE 5)

Written By: Sebastien Blain

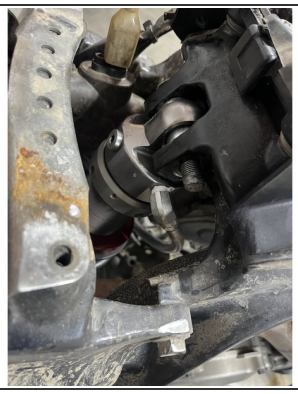

Step 1 — Install FRONT Elka shocks

- Install front shocks with the reservoir upside and facing outside the atv as shown.

Step 2 — Install REAR Elka shock

- Install shock with the hose fitting on the right side of atv, and pointing front of atv.
- Pass the hose in front of shock, and root the hose to the rear of atv on the left side.

Step 3 — Install REAR Elka shocks (continued)

- Fix the mounting bracket on the sub frame as shown.
- Install reservoir in clamp and tighten 6mm bolts at 5 Ft/Lb
