

Installing CorgiSoft

This guide will walk through the steps to manually install a CorgiSoft form on the GSS Mobile 2 device without using the desktop application.

Written By: Ken Stout

INTRODUCTION

This guide will walk through the steps to manually install a CorgiSoft form on the GSS Mobile 2 device without using the desktop application.

Step 1 — Download CorgiSoft Files

- Download the following zip file to your PC from this URL:
<https://www.emsbarcode.com/configuration...>
- Extract the files by right-clicking the zip file and selecting **Extract All** then selecting **Extract**

Step 2 — Installing App on Device - Part 1

- Press the App Drawer icon
- Swipe left to go to the second page and press the Settings icon
- Scroll down to Security and open

Step 3 — Installing App on Device - Part 2

- Scroll down to **Unknown source** and press the checkbox to enable
- ① Make sure the box is checked
- Press OK on the message that pops up
- Press the Home button on the device to go back to the home screen

Step 4 — Installing App on Device - Part 3

- Connect the device to your PC using the Micro USB Cable
- If a message pops up on the device or PC about how to connect the device, choose Media Device (MTP) which will allow you to transfer files to and from the device
- When the device is successfully connected, click on CIPHERLAB_RS30 in the File Explorer on your PC
- Then click USB storage
- Copy and paste the CorgiSoft_Android.CorgiSoft_Android_v2.apk file from the extracted zip file from Step 1 into the USB Storage folder

Step 5 — Installing App on Device - Part 4

- On the device itself, press the App Drawer icon
- Open the File Manager
- Press USB Storage

Step 6 — Installing App on Device - Part 5

- Scroll to the bottom and press the CorgiSoft_Android.CorgiSoft_Android_v2.apk file that you copied to the device in Step 4
- Press Install
- ❗ If a message about being unable to install due to security reasons, refer back to Steps 2 and 3 to enable unknown sources
- Press Done when the installation has completed
- ❗ Pressing Open will generate an error message

Step 7 — Installing App on Device - Part 6

- Back on your PC, create a folder inside the USB storage folder called “Outgoing” without the quotation marks
- To do this, right click then select New then Folder
- Then open the “storage” folder that is in the USB Storage folder
- Open the “sdcard0” folder

Step 8 — Installing App on Device - Part 7

- Create a new folder in the sdcard0 folder called “Incoming” without the quotation marks
- Copy and paste the 2 XML files from the extracted folder into the Incoming folder (FileConfig.xml and FormConfig.xml)

Step 9 — Installing App on Device - Part 8

- Back on the device, press the App Drawer icon
- Open the CorgiSoft program
