# 6- Setting Custom Homepage for GSS Customers

Walks through step-by-step on how to set up a custom homepage on Android OS for Global Shop Customers

Written By: Ian Savitch

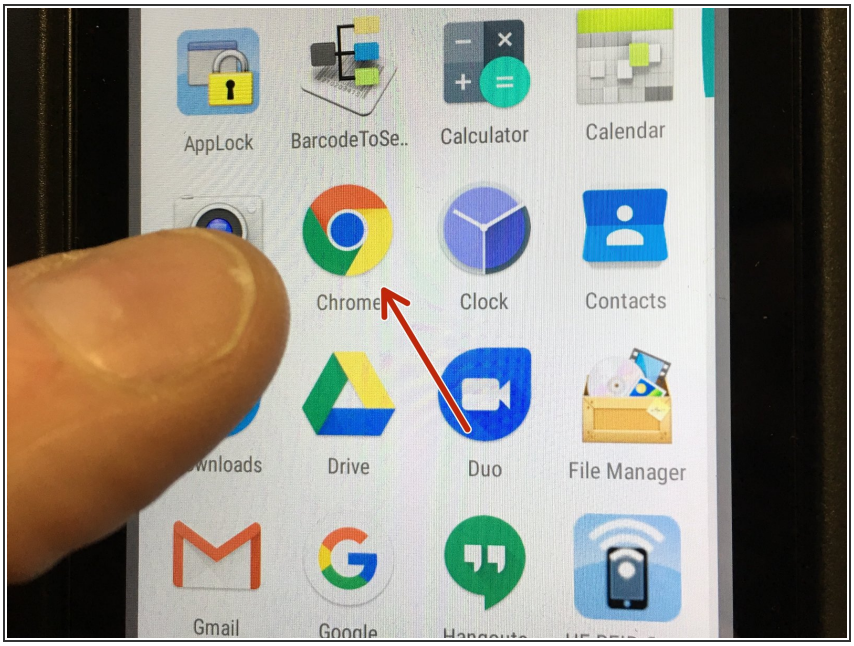

## Step 1 — Select the Home Button

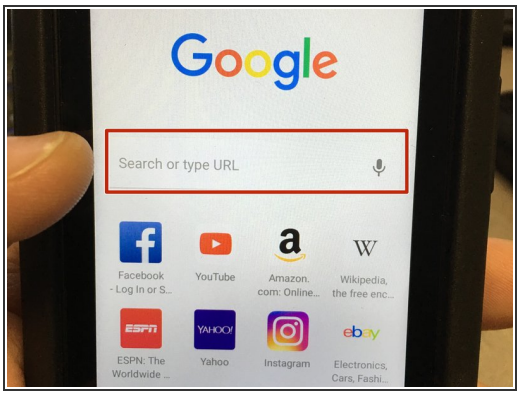

- From the Home Screen, select the home button.

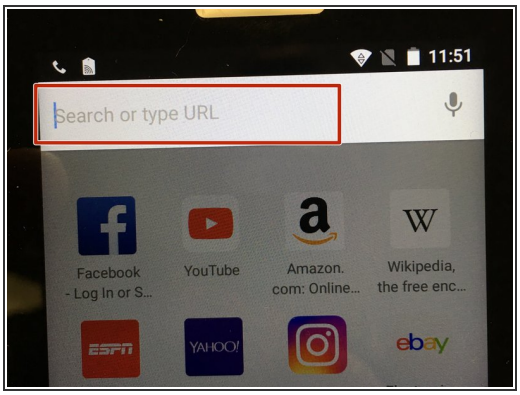

## Step 2 — Select Chrome

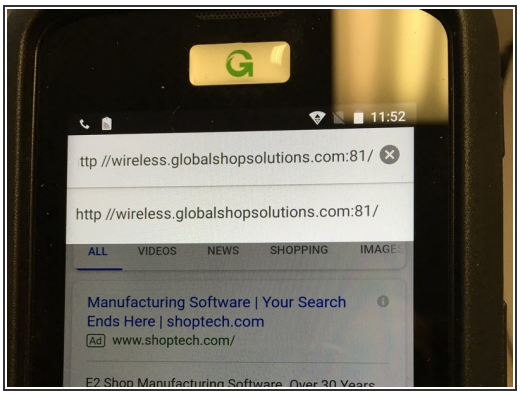

- Select the Google Chrome Button

## Step 3 — Adding Your Home page

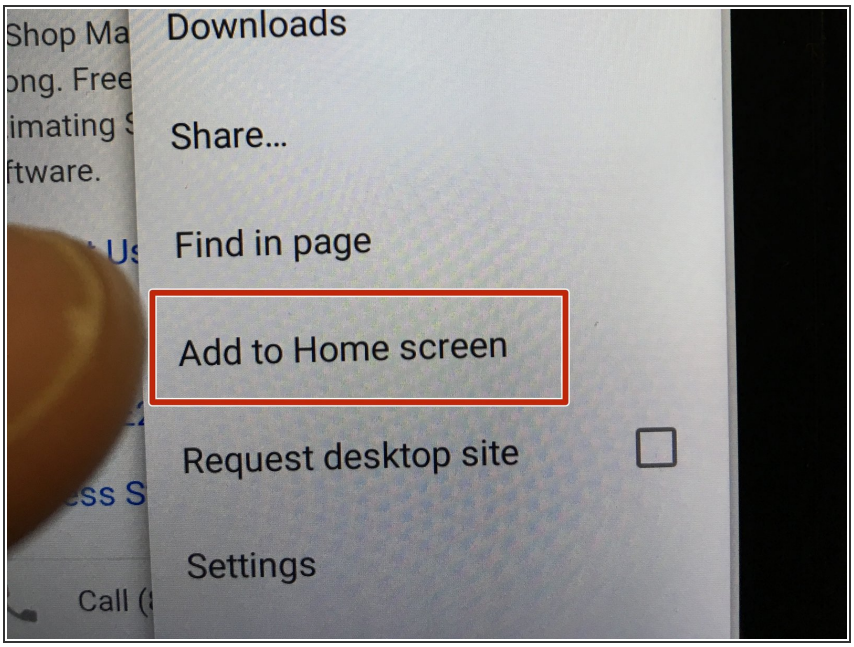

- From the Google Chrome Screen, Select the 'Search or Type URL' part of the screen.
- A window will open that will allow a user to enter the IP address or web address that is wanted
- See Example of address for GSS Demo Site

## Step 4 — Setting IP Address to the Home Screen

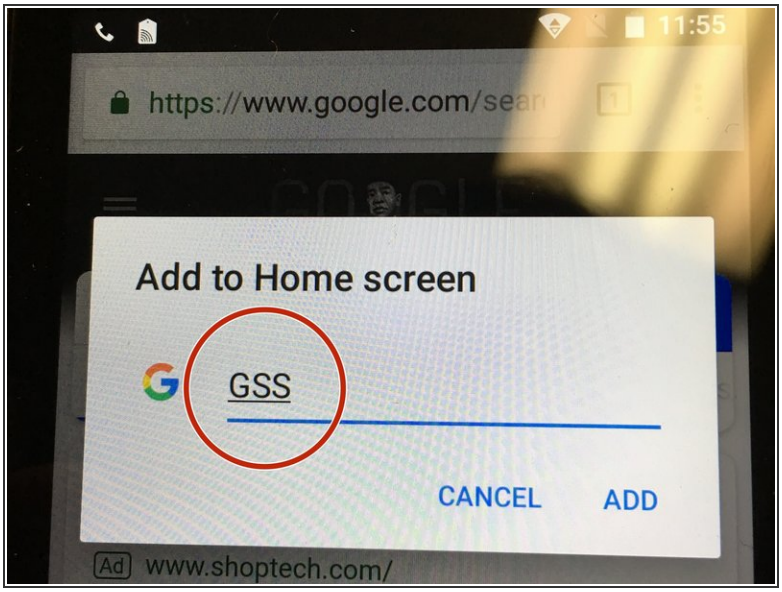

- Press the Elipsis (Three dots) in the top right hand of the screen.

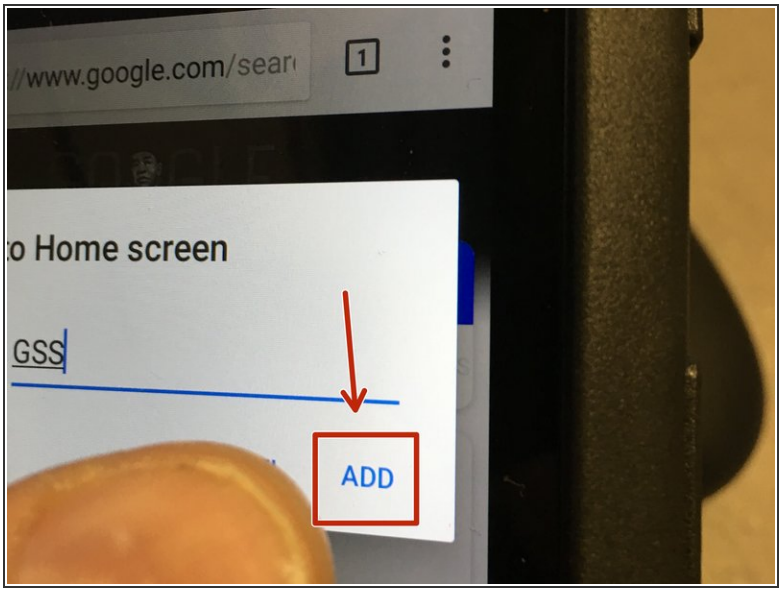

## Step 5 — Add to the Home Screen

- From the menu, select 'Add to the Home Screen'

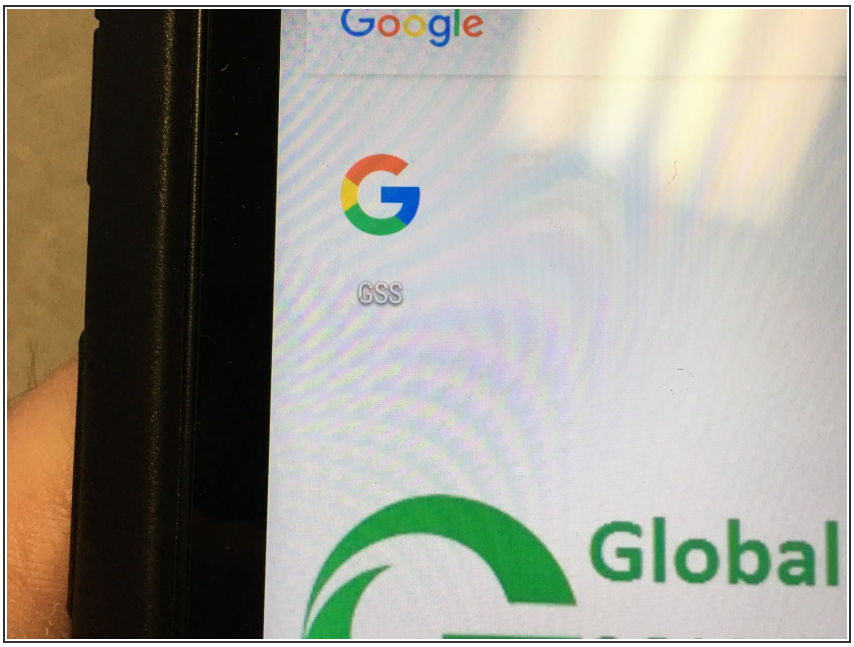

## Step 6 — Name the Home Screen Shortcut

- Name or Rename whatever you want your shortcut to be called when you save it.
- Press the ADD Button

## Step 7 — Home Screen - Shortcut Created

- Navigate back to the Home screen, to find the Google shortcut app, named what you labeled it as.
- Pressing the App will take the user directly to the site
