

01 - Constructing the Cart

Written By: Eric Sutter

Step 1 — Identifying Cart Parts

- A. Cart Top
- B. Cart Bottom
- C. Power Strip and Cable
- D. (4) Casters
- E. (4) Bolts. (4) Nuts, (1) Allen Key
- G. Keyboard Tray
- H. Tray Tracks
- I. (4) Bolts, (4) Nuts

Step 2 — Attaching the Keyboard Tray Tracks (Part 1)

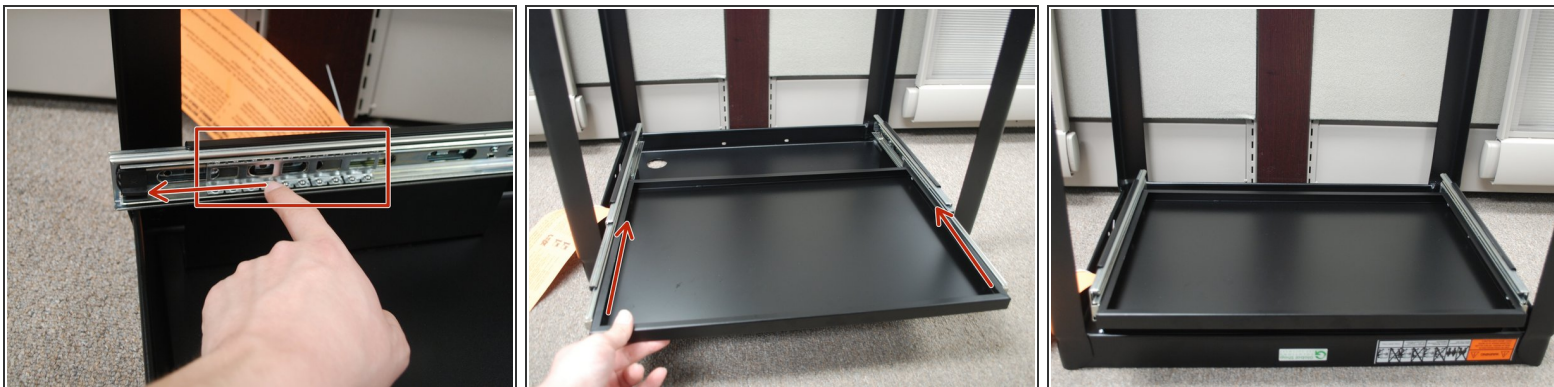

- Rotate the Cart Top 90° so it is on it's side.
- Insert two of the screws from the Keyboard Trey Kit through the two top holes.
- Hold the Keyboard Track up to the Cart Top while putting the screws through it's holes.
 - ❗ *Ensure the gap in the track (shown by the magenta box and arrow) is facing towards the **back** of the cart (the side without the label).*

Step 3 — Attaching the Keyboard Tray Tracks (Part 2)

- Screw on nuts from the Keyboard Tray Kit around the screws.
- Return to the top of the Cart Top and finish by tightening the bolts with a Phillip's head screwdriver.
- Repeat steps 2-3 for the other track.

Step 4 — Attaching the Keyboard Tray

- Slide the inner most part of the sliders as far out as you can.
- Insert the Keyboard Tray into the sliders and push it as far back as you can until fits into place.

Step 5 — Adding the Casters

- Flip the Cart Bottom face down
- Insert the metal peg into the slot
 - ① This will require force. It is recommended you use a mallet to get it to go in all the way.
- Make sure the casters are flush against the cart.
- Ensure that the casters with brakes are both put on the front or the back.

Step 6 — Preparing to Combine the Cart Top and Bottom

- Rotate the Cart Bottom 90° so it is on it's side.
- Slide the Cart Top over the Cart Bottom.
- Ensure the two holes on the top and middle shelf align.

Step 7 — Combine the Cart Top and Bottom

- Align the holes appropriately to desired height.
 - ① The higher your aligned holes are, the taller your cart will be.
- Insert one of the bolts provided with the cart.
- Attach the nut to the bolt from the inside of the cart.
 - ① It is recommended you use a wrench to get it to tighten successfully.
- Repeat this step for each side.

Step 8 — The Cart is Complete!

- Stand the cart up so it stands on it's casters.
