INTRODUCTION

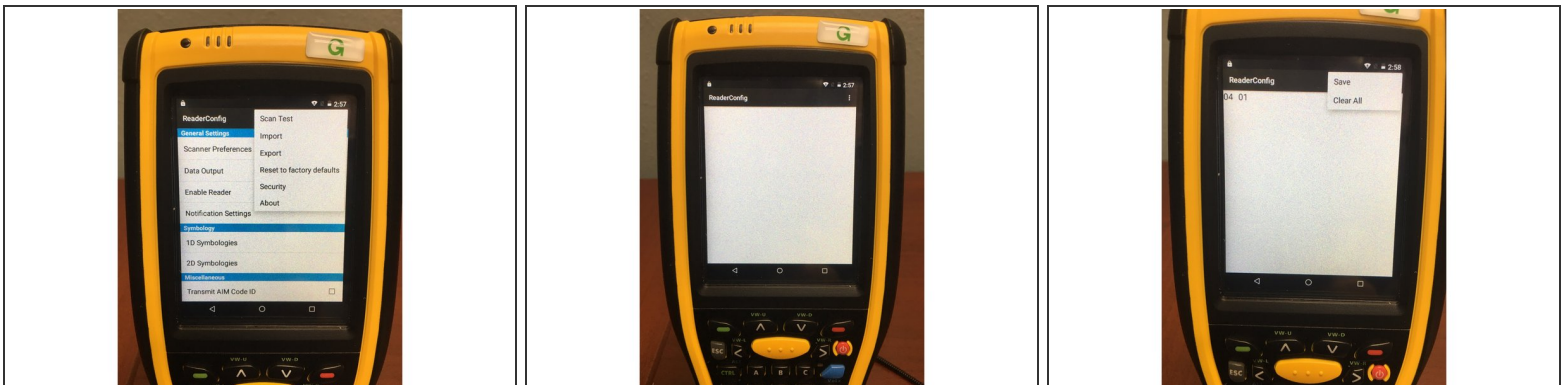

These steps will get you to the area where you can test scanning barcodes and evaluating the data.

Step 1 — Navigating to Scan Test Pt. 1

- From the Home screen, choose the Apps button.
- Find the ReaderConfig app and select it.
- Touch the three dots on the top right corner of the screen.

Step 2 — Navigating to Scan Test Pt. 2

- From the drop down menu that appeared, press Scan Test.
- You will be in an area where you can now test your barcodes. As you scan barcodes, you will see them populate in the white field.
- When you want to clear the data, press the three buttons on the top right corner and hit Clear.
- ① While in Scan Test, this is a great opportunity to test your device in your environment without inputting any data into other software. Take the time to place barcodes at a distance in the intended environment to get a feel for the distance of the scan.
