Bezel

Written By: Iroh

INTRODUCTION

The magnetic Framework Bezel is one of the easiest components to swap. No tools needed, just align it to the Display and you are all set. We have several color options so that you can further customize your very own Framework Laptop 16.

© 2025

Step 1 — Open the laptop

- Open the laptop.

Step 2 — Create a gap

ⓘ The bezel is secured with magnets.

- Slide your fingernail under the inside edge of either bottom corner of the bezel.
- Pull the bezel away from the screen to release the first few magnets.

Step 3 — Remove the bezel

- Lift the bezel around the perimeter of the screen until all of its magnets are released.
- Remove the bezel.

Step 4 — Install the bezel

- Align the bezel over the perimeter of the display and let the magnets pull the bezel into place.
  - ⓘ The bezel should "snap" into place. If it doesn't, realign it and make sure it sits flush with the display.

Step 5 — Remove the plastic liners

- If there are any plastic liners covering the webcam and microphone, remove them.
