Framework Laptop 13 Pro Pre-Built Quick Start Guide

Written By: Iroh

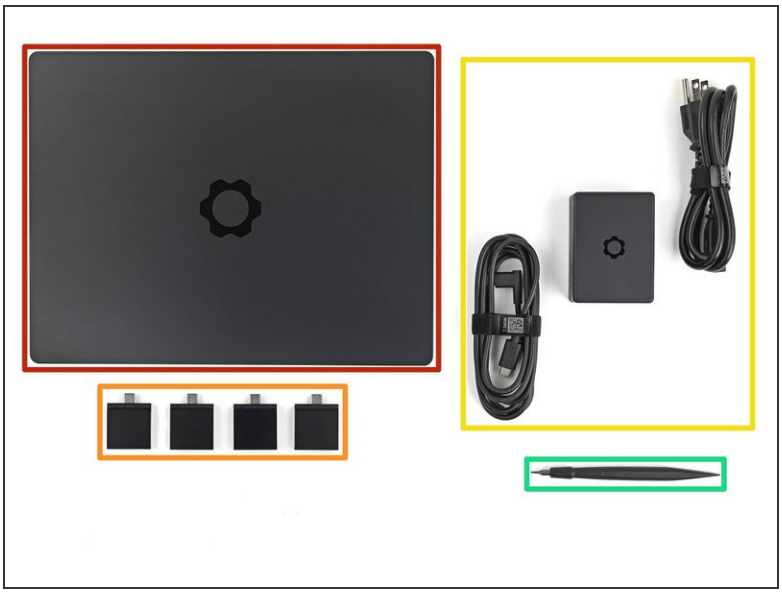

INTRODUCTION

Congratulations on getting the Framework Laptop 13 Pro Pre-built Edition! Follow this quick start guide to get your laptop set up and running in just a few minutes.

If you got the Framework Laptop 13 Pro DIY Edition, follow this Quick Start guide instead.

Step 1 — Unbox your Framework Laptop

Unbox your Framework Laptop and make sure you've received the following items:

- Framework Laptop Chassis with pre-installed Bezel, Memory, Storage, and Input Cover.
- Expansion Cards
- Power Adapter
- Framework Screwdriver

Step 2 — Install the Expansion Cards

ⓘ For Expansion Card compatibility, check here.

- Slide an Expansion Card into an Expansion Card slot.
  - ⓘ You don't need to unlock the latch to install the Expansion Cards—only when you want to remove them.
  - ⓘ The Expansion Cards should click into place, and the front edge should be flush with the laptop.
- Repeat for the remaining Expansion Cards along that edge.

Step 3

- If there's a red bar showing under the Expansion Card latch, use your finger to flip the latch and lock the row of Expansion Cards above it.
  - Locking an Expansion Card helps keep it in place when you unplug cables from it.

Step 4

- Repeat the previous two steps for the other row of Expansion Cards.

Step 5 — Assemble the Framework Power Adapter

- Plug the AC Cable into the Power Adapter.
- Plug the USB-C Cable into the Power Adapter.
  - ⓘ You can plug either end of the USB-C cable into the adapter.
- Plug the AC Cable into a power outlet.

Step 6 — Plug in the Laptop

- Your Framework Laptop ships in shipping mode, where the Battery is disabled until you plug the laptop in for the first time.
- Plug the USB-C Cable into any USB-C port on your laptop.

Step 7 — Turn on the Laptop

- Your Framework Laptop is ready for use! Open the lid and press the power button at the top right corner of the Laptop.
  - ⓘ The first boot will take longer and start with a “Memory Training in Progress” screen.
  - ⓘ For drivers, firmware, and software updates, check out this page.
