Bezel Replacement for Framework Laptop 13 Pro

Written By: Iroh

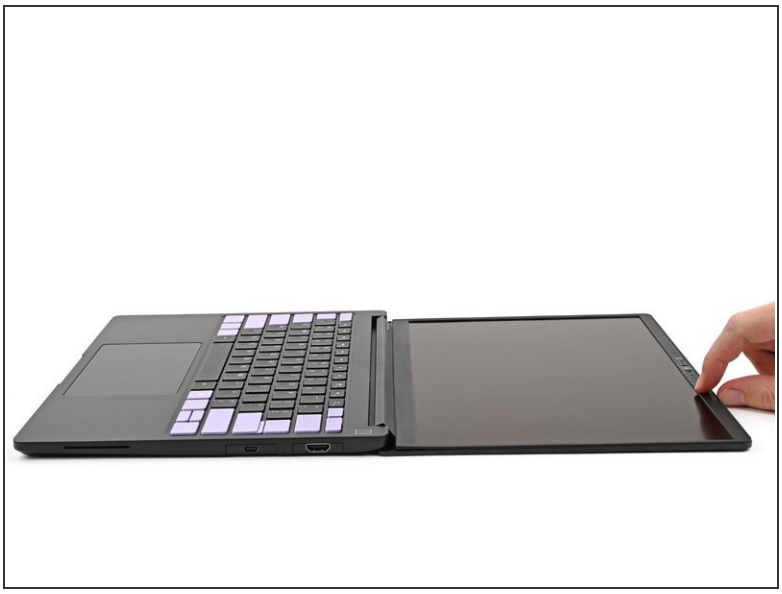

INTRODUCTION

Use this guide to replace the Bezel in your Framework 13 Laptop Pro.

© 2026

Step 1 — Reposition the Laptop

- Open the laptop so the screen sits flat on your work surface.

Step 2 — Remove the Bezel

ⓘ The Bezel is secured with magnets.

- Slide your fingernail under the inside edge of either bottom corner of the Bezel.
- Pull the Bezel away from the screen to release the first few magnets.

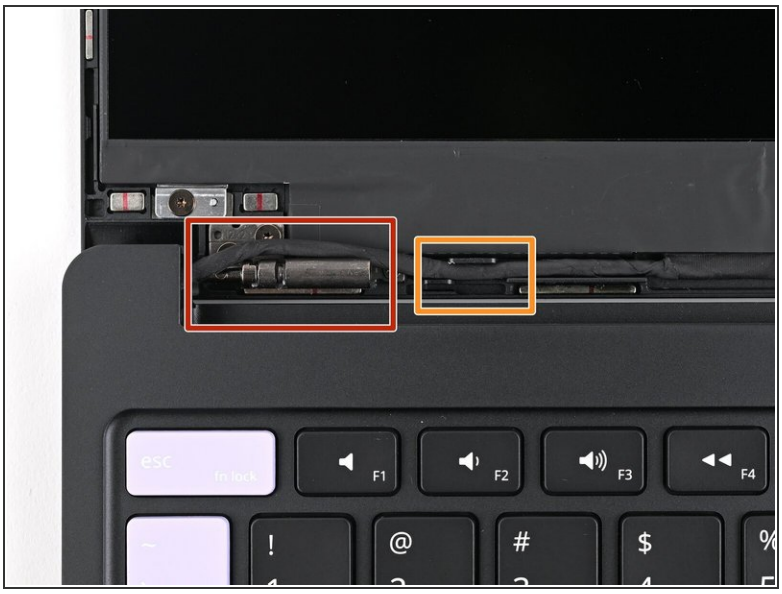

Step 3 — Lift the Bezel

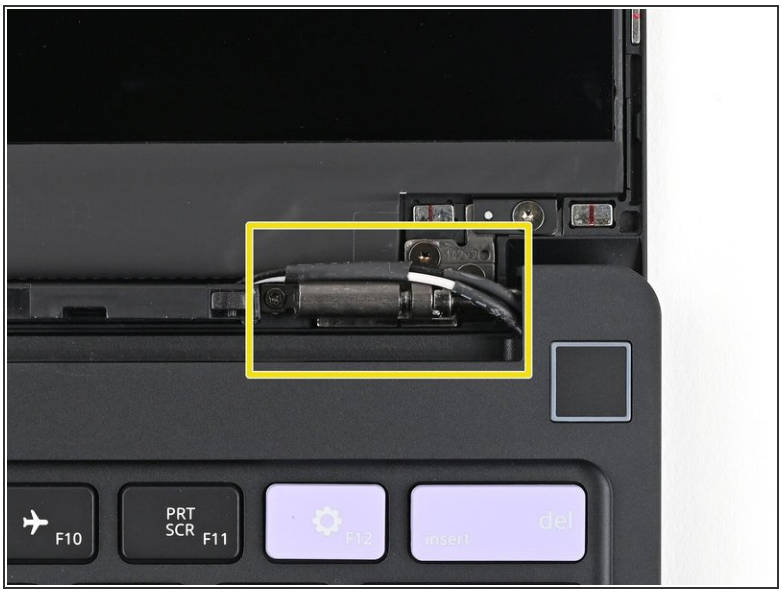

- Lift the Bezel around the perimeter of the screen until all of its magnets are released.
- Remove the Bezel.

Step 4 — Check the cables

- Before continuing, check if cables next to the hinges are routed properly:
  - The Display Cable should be routed just above the hinge without any large gaps.
  - The Display Cable should be routed between the metal clips.
  - The Webcam Cable should be routed just above the hinge without any large gaps and shouldn't overlap with the antenna cables.

⚠ If the cables aren't routed properly, the Bezel won't sit flat and you risk damaging the Bezel and the Display during reassembly.

Step 5 — Install the Bezel

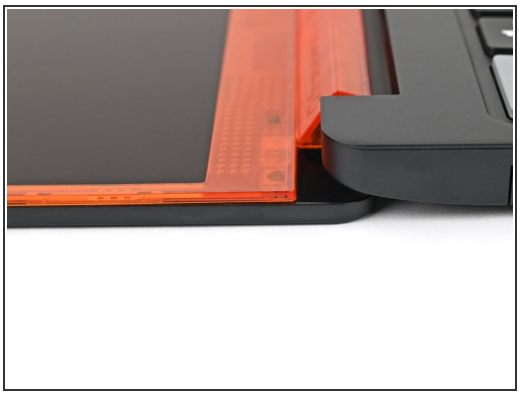

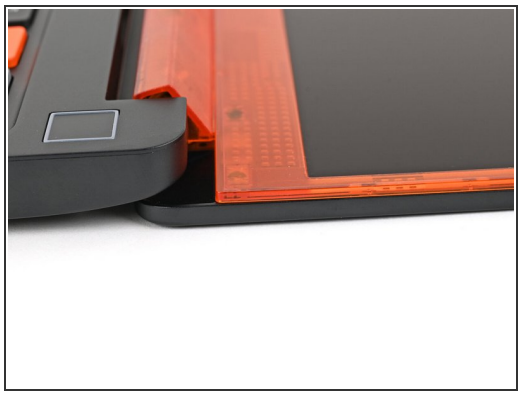

ⓘ If there's any liners covering adhesive on the back of the Bezel, remove them now.

- Align the bottom edge of the Bezel with the top edge of the Input Cover and press down so the Bezel covers the hinges and cables.
  - ⓘ The bottom edge of the Bezel should sit flat and the magnets at its edges should "snap" into place.
- Lay the rest of the Bezel over the screen and let the magnets pull it into place.

Step 6

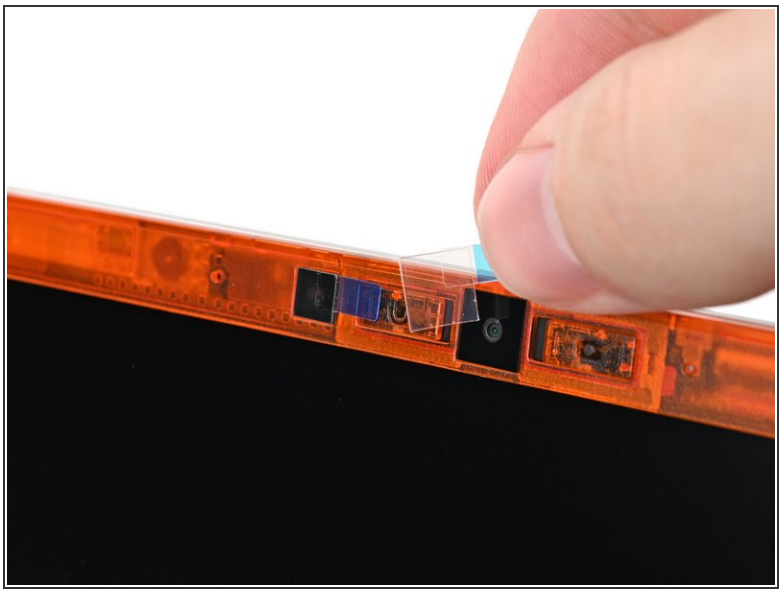

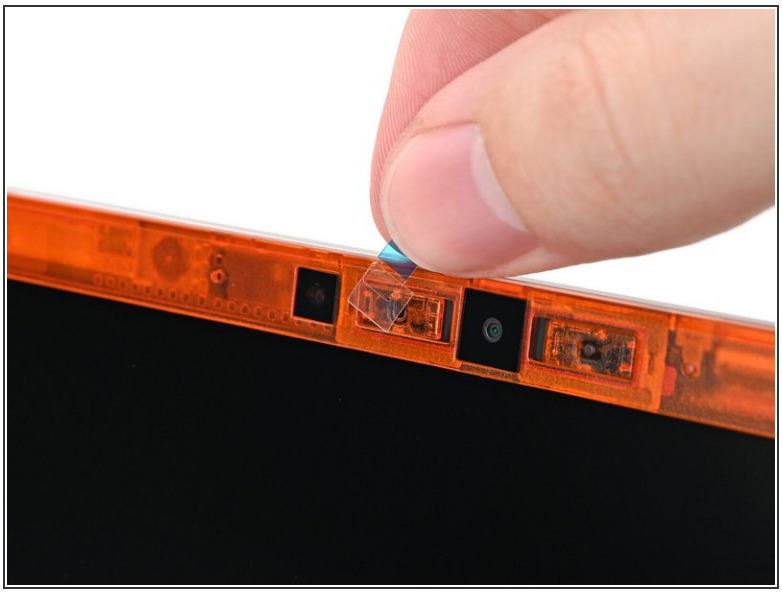

ⓘ Check that all four corners of the Bezel sit flat on the screen. If they're uneven, do the following:

- Use your fingers to press around the edge of the Bezel. The magnets should easily snap into place.
- If the Bezel is still uneven, remove the Bezel and reseat it. Refer to this step for how the cables should be routed.

Step 7 — Remove the plastic liners

- If there are any plastic liners covering the webcam and microphone, remove them.

You finished fixing your Framework Laptop!
