Step 1 — Adding a Bow

- Face the back side of the present (indicated by the piece of tape) upward. Feed some ribbon underneath the present perpendicular to the orientation you want your bow to appear.

⚠ Do not cut the ribbon yet. Though you'll want to unravel a bit more ribbon than you think you need for the bow. You can always trim it later.

- Tie a single knot with the two ends of the ribbon.
- Pull tight and press down on the knot to make it flat.
