

Front Desk TV

Running a slideshow on the front desk TV

Step 1 — What it is.

- We added a TV to the front desk so that we can share information without having to print out a million flyers.
- It is running on a chromecast that is attached to the LMN network. The front desk computer is able to cast to it.
- All of the images have been added to a Google Photo Album, the TV should automatically show the slideshow when it is turned on.

Step 2 — Editing the Slideshow

- If you have google drive access to LMN Supreme, you can edit the slideshow to correct information, update the calendar, etc.
- Click the "Edit Slideshow" bookmark in the bookmarks bar to access it.
- Please feel free to edit information so that it is more correct. Please don't reorganize or remove pages, or redesign pages until you get the go-ahead from one of the volunteer coordinators.
- Once the Slideshow has been edited, save the slide as an image, and upload to <https://photos.google.com/share/AF1QipOB...>
