A close-up image of a 3D printed owl. The owl is brown with large white eyes and a black beak. It is wearing a grey shirt. In the bottom right corner of the image, there is a button that says 'Discover Canvas' with an external link icon.

Step 1 — Element On-Screen Setup

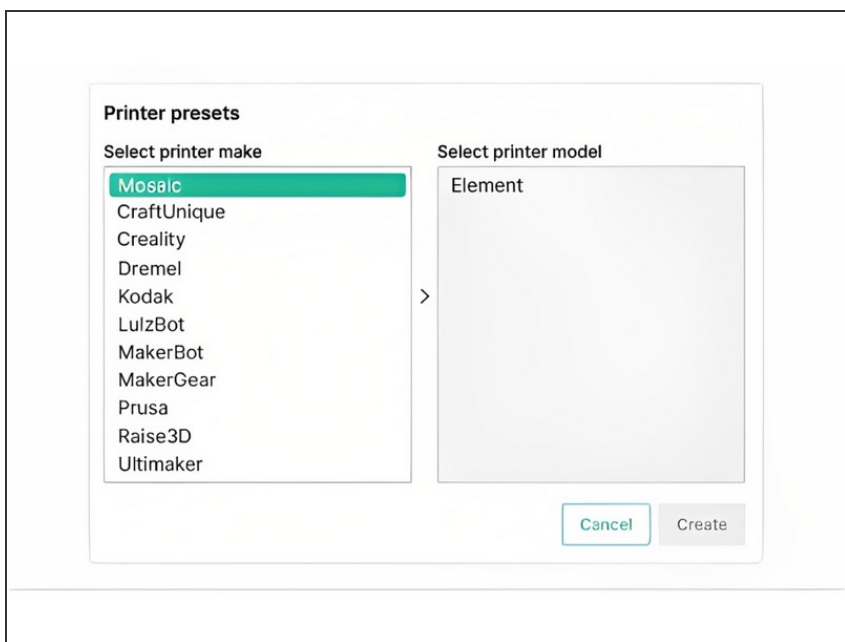

- Upon first powering on Element, the on-screen set up process will guide you through connecting Element to the internet and updating firmware

Step 2 — Activating Element on Canvas

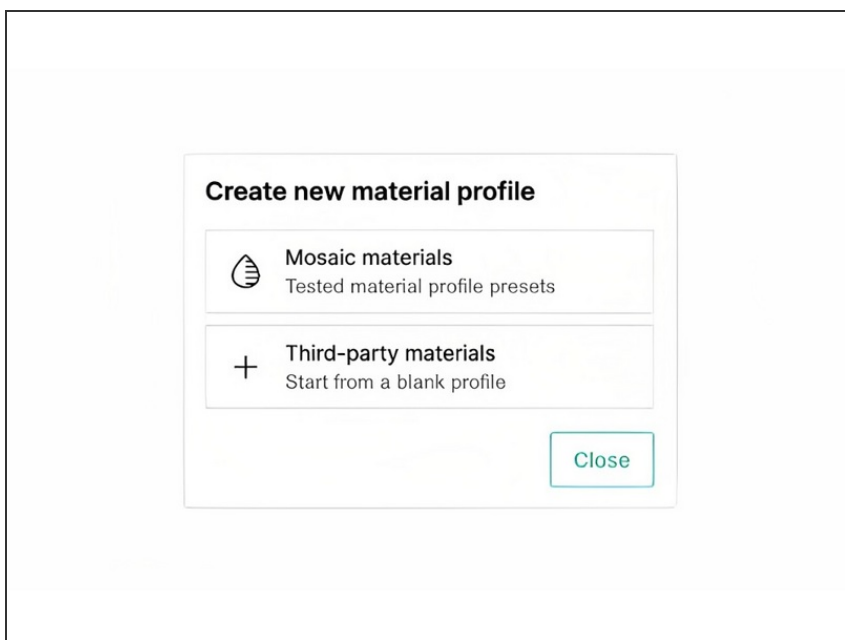

- Visit Canvas3d.io/ to register an account
- The activation code on Element's screen can then be entered on Canvas3d.io/connect

Step 3 — Setting Up Printer Profile

- On Canvas, Select *Printers* > *+New Printer*
- Select the preset Element profile

Step 4 — Setting Up Material Profiles

- Go to *Materials* > *+New Material*
- Use presets for Mosaic materials, or create profiles for 3rd-party materials
- Find more information on managing material profiles [here](#)
