Array ●

INTRODUCTION

In this guide you will learn how to:

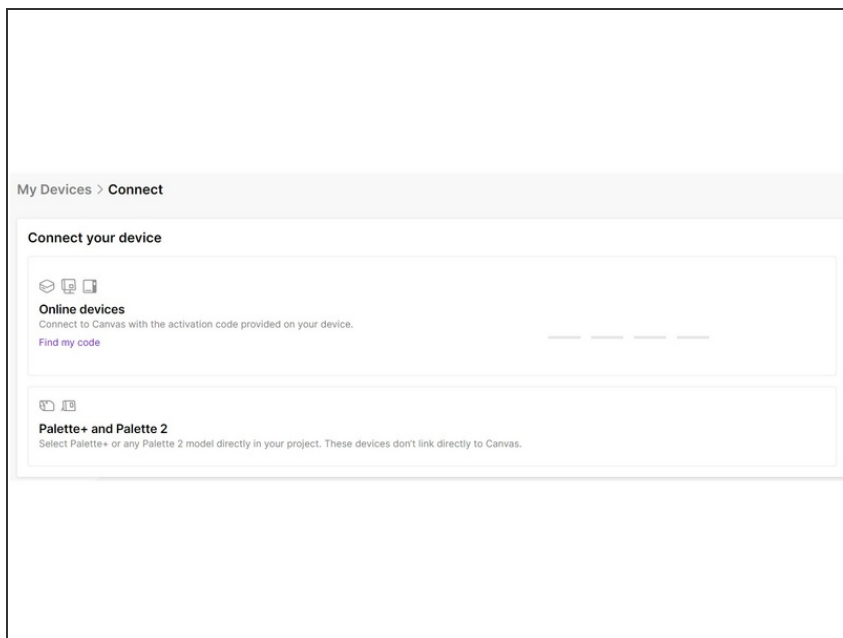

- Connect Array to the Internet
- Connect Array to a Canvas account
- What controls are possible via the Array device view
- How to view queue and print history
- Perform troubleshooting for Internet and Canvas connections

Step 1 — Connect Array to Internet

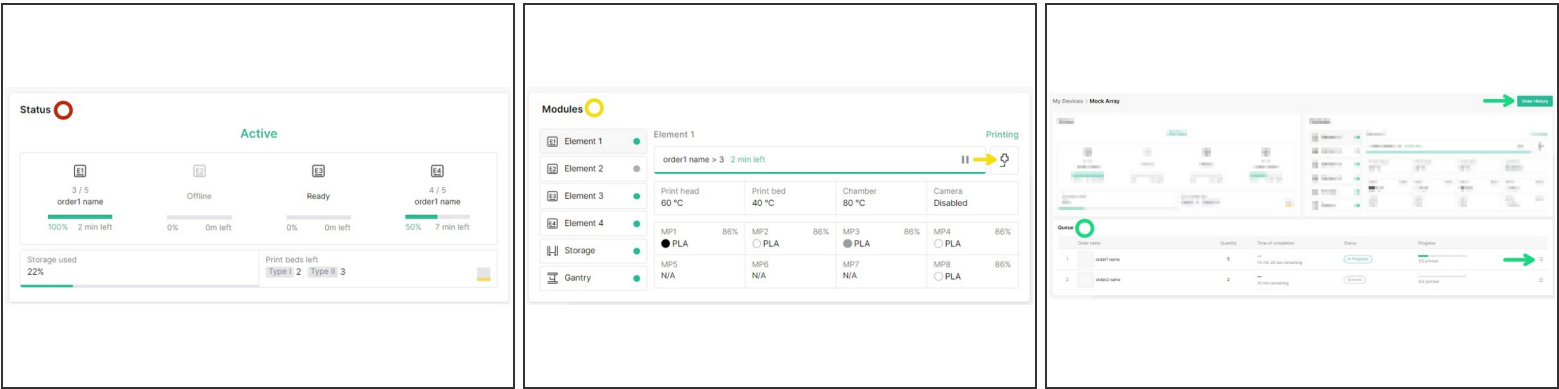

- Array connects to the Internet by Ethernet.
- Check the status of the connection by going to the *Settings > Network*.

Step 2 — Connect Array to Canvas Account

- Go to *Settings > Canvas* to generate an activation code.
- Visit canvas3d.io/devices and click **Connect Device** to enter the activation code.

Step 3 — Array Device View

- Visit the Devices menu and double-click on the linked Element printer to view its status and controls.
- **Status:** Indicates the overall status of the Array system, Element printers, storage usage, and number of print beds remaining in the storage cart.
- **Modules:** Provides more details for each Element printer, the storage and gantry systems. Access printer controls for each Element printer, and options to deactivate Element.
- **Queue and order history:** View progress for ongoing and upcoming orders. Options for editing jobs in an order. Order history to view previous print runs ([Learn more](#)).
