Step 6 — Recording a return movement

The screenshot shows the Keeper software interface. A modal dialog box is open with the title "Record return movement for these animals?". Inside the dialog, it says "Movement saved." and "Would you also like to record a return movement for these animals?". At the bottom of the dialog are three buttons: "YES", "NO", and "Cancel". In the background, a table is visible with columns: "Animal ID", "DOB", "Brought in", "Breed", "Sex", "Dam", "Move date", and "Location". The table contains several rows of data, with some rows highlighted in yellow. Below the table, there is a section titled "3. Please check the list before submitting" which shows "3 cattle selected: UK582608701731, UK582608701717, UK582608701311". Below this is a section titled "4. Submit movement" with a "Submit" button.

- After submitting the OFF movement you will be asked - "Would you also like to record a return movement for these animals?"
- **YES** - If yes is selected, the ON movements will pre-populate for the user to complete the movement of the same batch of animals
- **NO** - If no is selected, a separate ON movement will need to be moved - back on to your holding after the show.
