Meraki OS X Client - Installation (T2Flex)

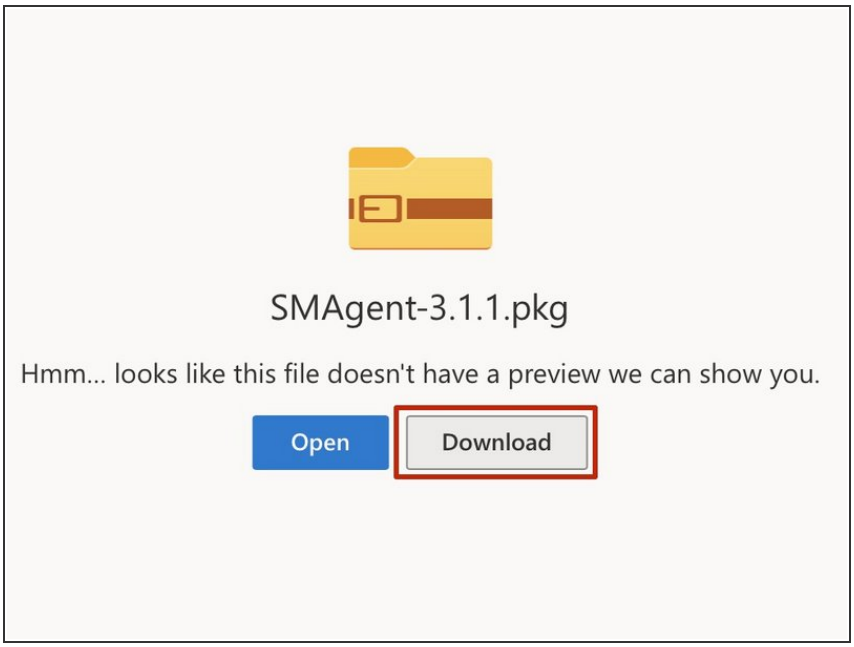

Written By: Brendon Welch

INTRODUCTION

Meraki is used by T2 Flex Force (T2 Tech Group) to continually monitor your computer. This monitoring includes recording keystrokes, e-mail (and other) messages sent and received, websites visited, movements of the mouse, the location of this device, and all other activity conducted on this computer. By installing the Meraki PC Client and logging into your computer, you consent to this monitoring by T2 Flex Force (T2 Tech Group) and agree that T2 Flex Force (T2 Tech Group) may make use of this information as it deems appropriate.
