Meraki PC Client - Installation

Written By: Brendon Welch

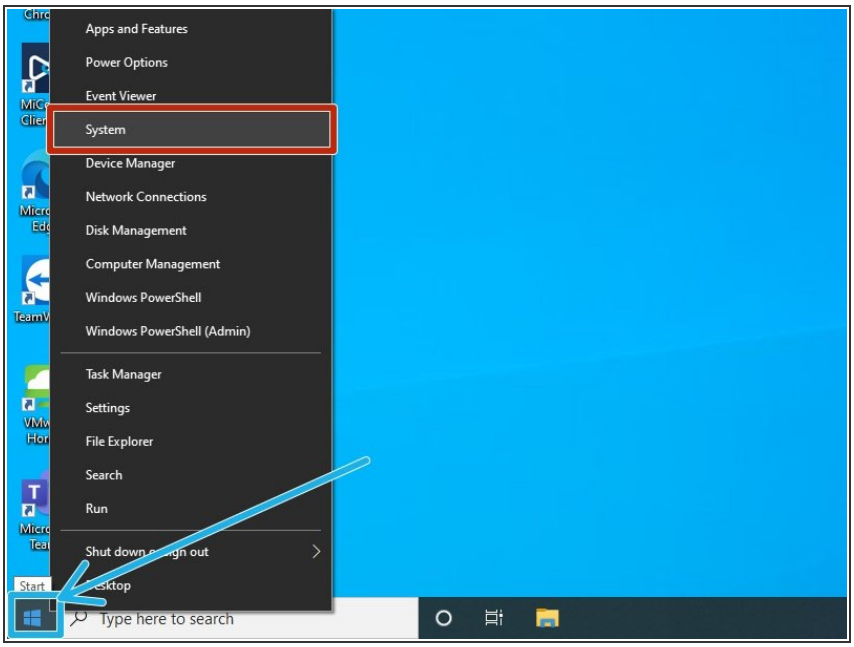

INTRODUCTION

Meraki is used by T2 Flex Force (T2 Tech Group) to continually monitor your computer. This monitoring includes recording keystrokes, e-mail (and other) messages sent and received, websites visited, movements of the mouse, the location of this device, and all other activity conducted on this computer. By installing the Meraki PC Client and logging into your computer, you consent to this monitoring by T2 Flex Force (T2 Tech Group) and agree that T2 Flex Force (T2 Tech Group) may make use of this information as it deems appropriate.

Step 1 — Meraki PC Client - Installation

- Right-click the **Start** button in the taskbar
- Click **System**

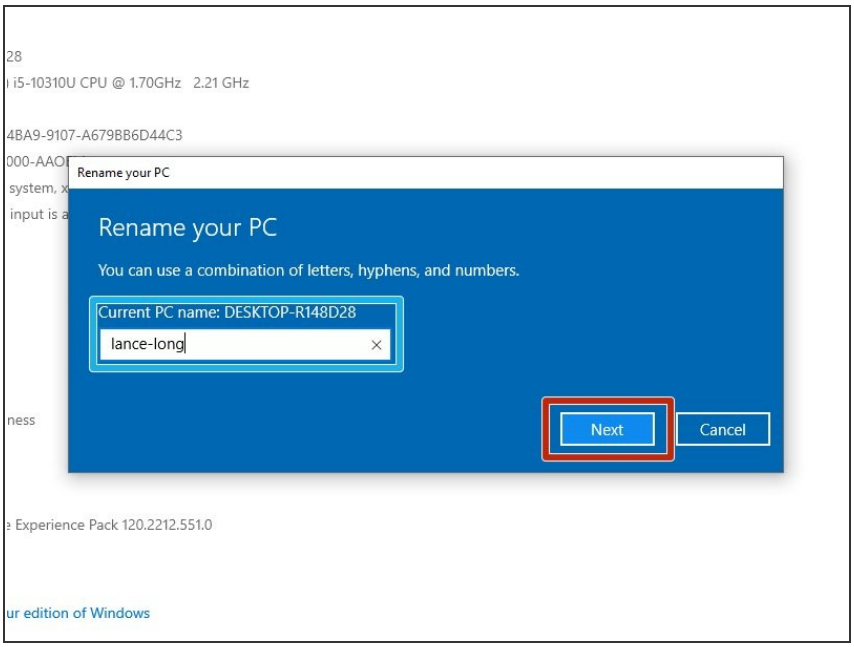

Step 2

- Click **Rename this PC**

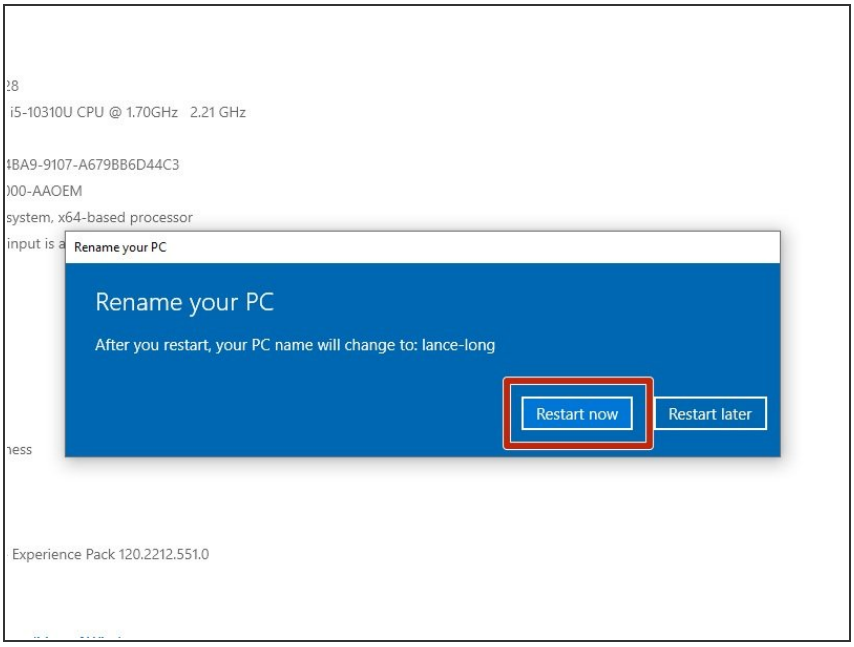

© 2024

Step 3

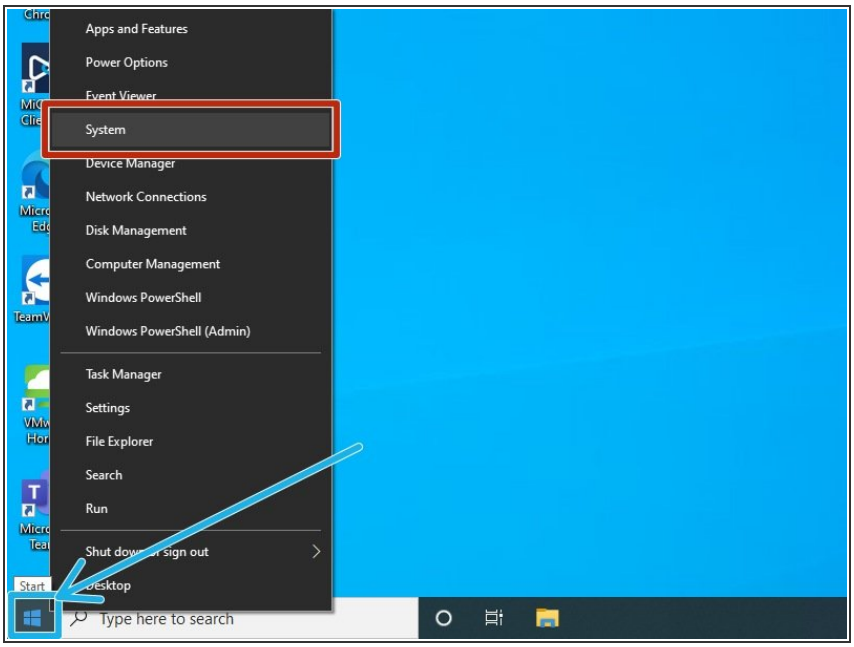

- The PC name needs to be changed to your *firstname-lastname*
- Enter the **PC Name**
- **Example:** *lance-long*
- **This is just an EXAMPLE, do not rename your PC Lance-Long. Use your own First Name and Last Name. Any machine named Lance-Long will be flagged and removed.**
- Click **Next**

Step 4

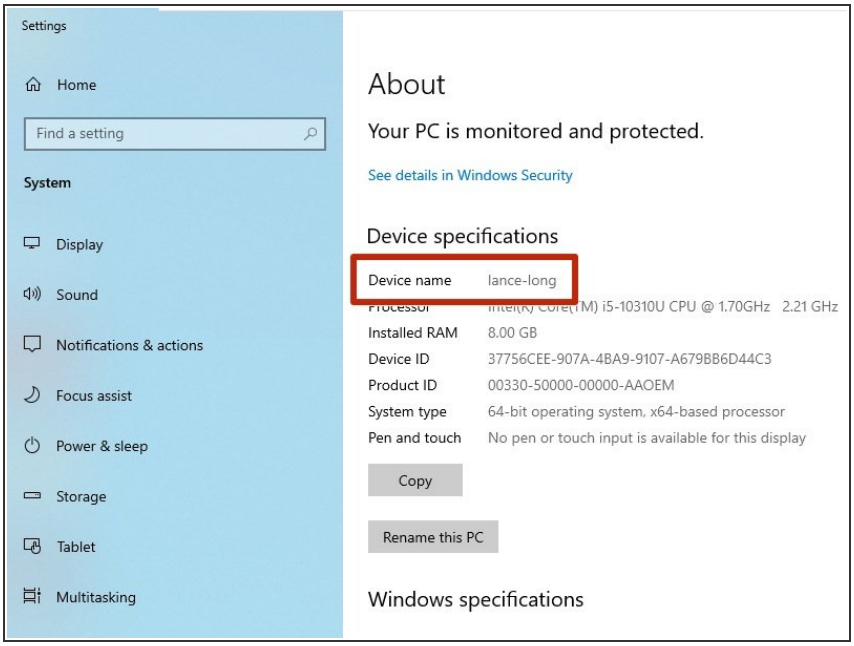

- *The PC name will be changed once you restart your computer.*
- Click **Restart now**

Step 5

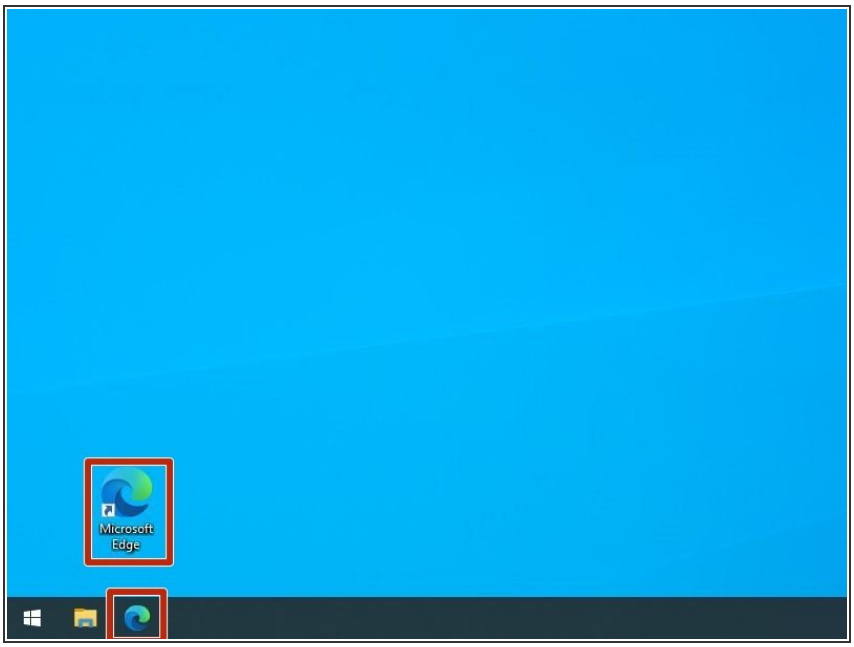

- Right-click the **Start** button in the taskbar
- Click **System**

Step 6

- Verify the **Device name** is your *firstname-lastname*

Step 7

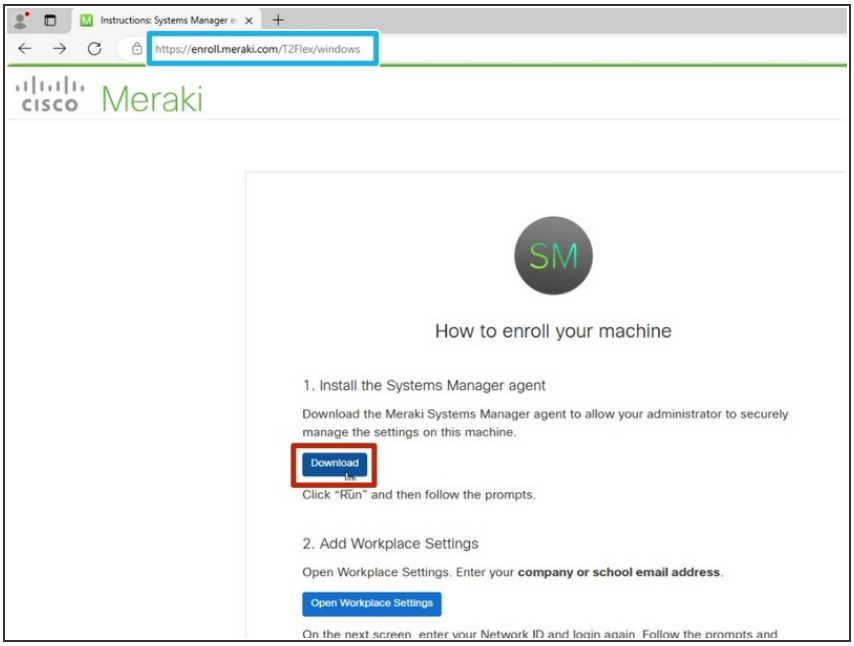

⚠ **Before proceeding, please ensure the name of your PC to your "First name-Last name".**

Any web browser can be used for this step. In the example, Edge is used.

- Open **Edge Browser**

Step 8

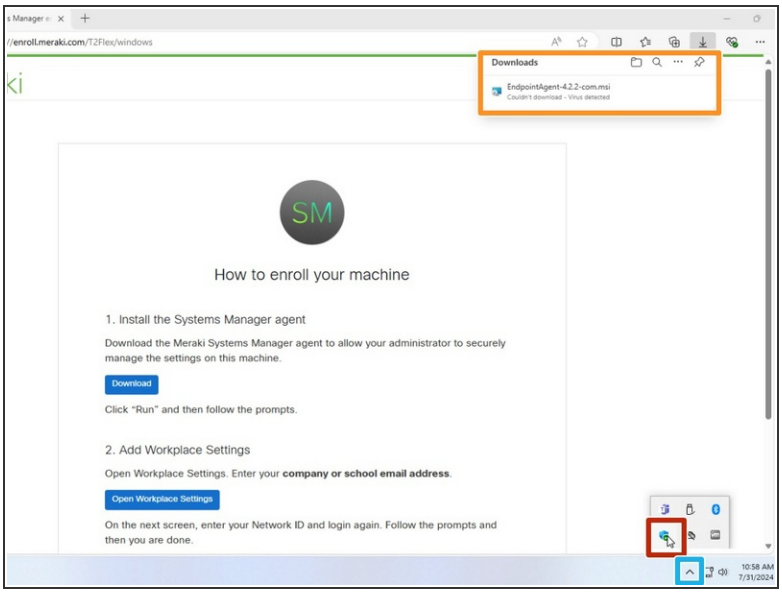

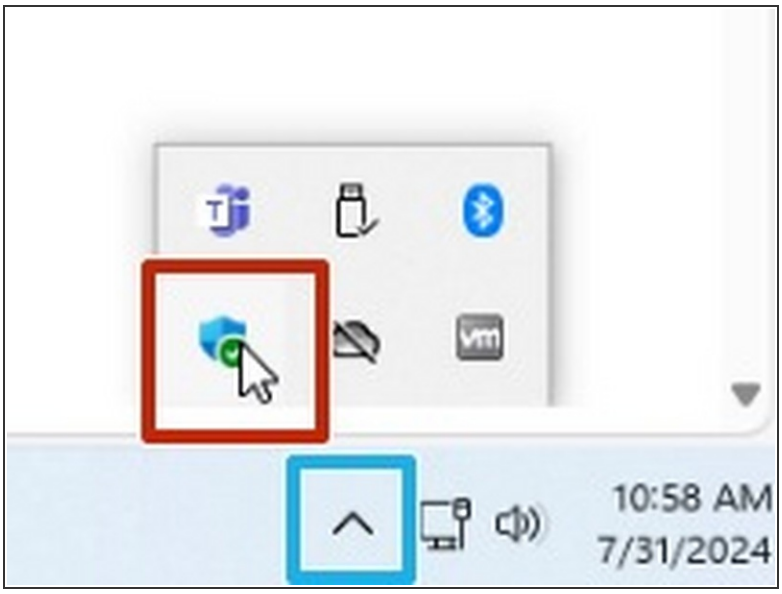

- **CLICK HERE to go to the Meraki Download site**

Once the download is completed:

- Click **Download**

Step 9

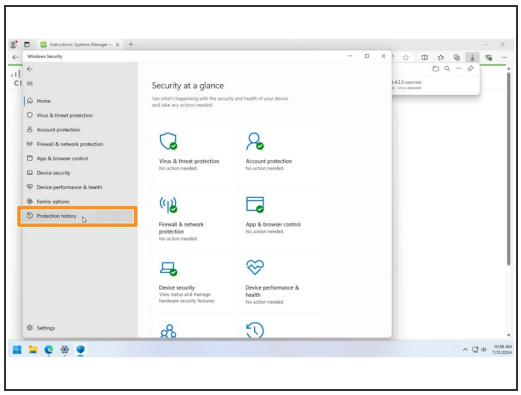

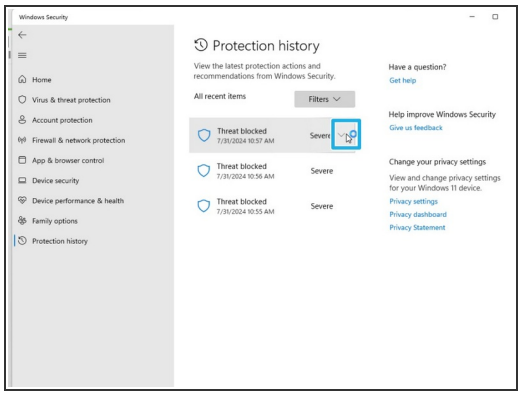

⚠ **The download may be detected as a virus, this is normal.**

If the download is detected as a virus by Windows Security:

- The download with show **Virus Detected**
- **Expand the Taskbar**
- Click on **Windows Security**

Step 10

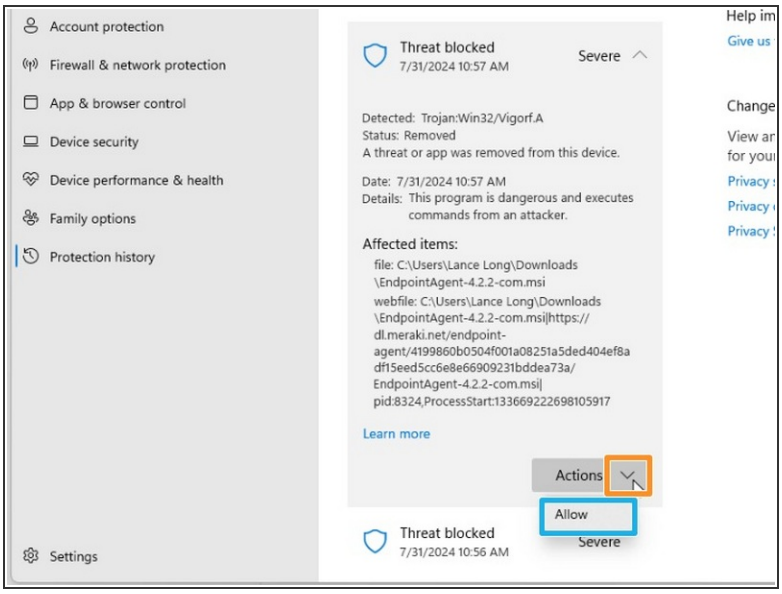

- Click **Protection History**
- Click the **Threat Severity Arrow**

ⓘ **Windows Security will ask for permission to make changes.**

- Click **Yes**

Step 11

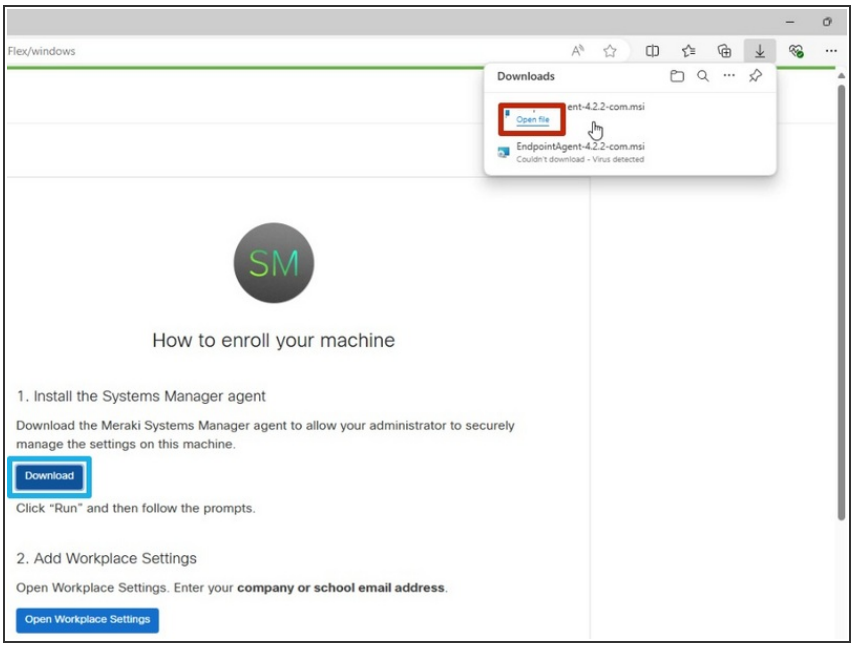

- Click on the **Actions Arrow**
- Click **Allow**

ⓘ **Windows Security will ask for permission to make changes.**

- Click **Yes**

Step 12

⚠ **Go back to your web browser, when you reattempt the download it will no longer be detected as a virus.**

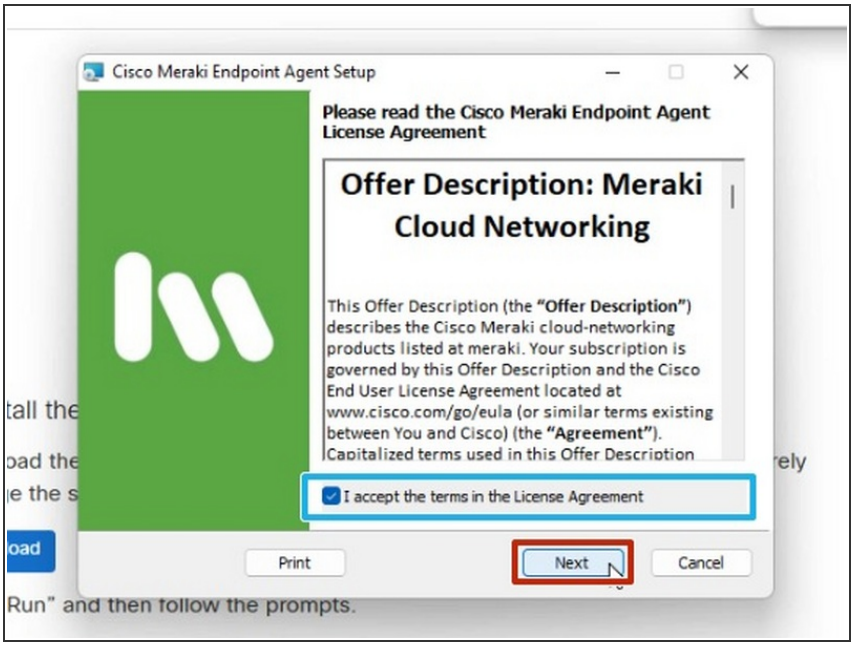

ⓘ **CLICK HERE to go to the Meraki Download site**

- Click **Download**

Once the download is completed:

- Click **Open file**

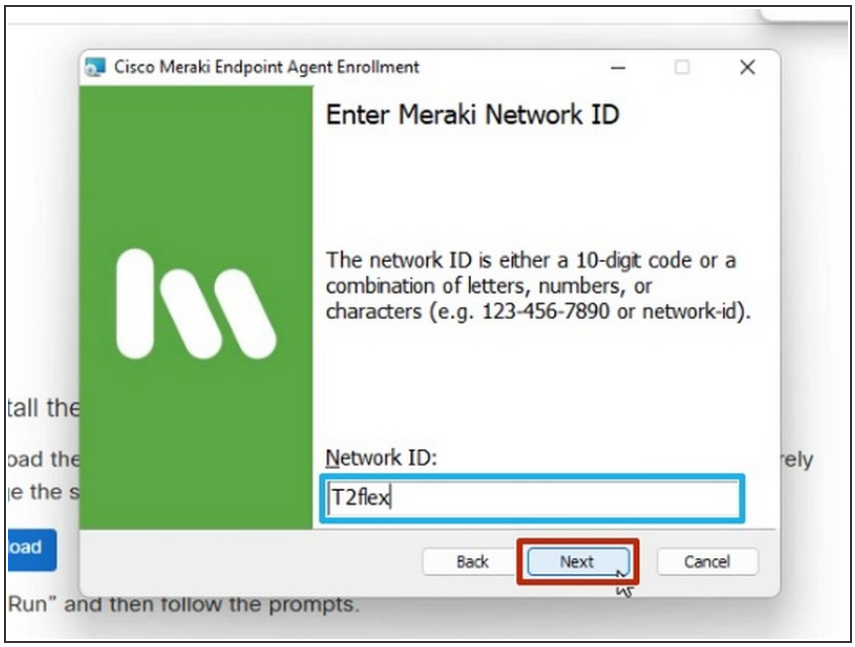

Step 13

ⓘ **Meraki systems Manager Agent Setup will appear.**

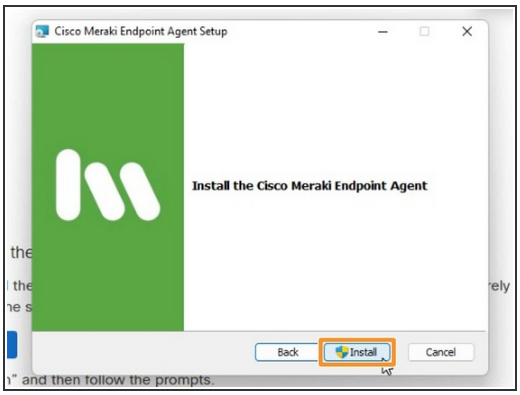

- Review and **Accept the terms in the License Agreement**
- Click **Install**

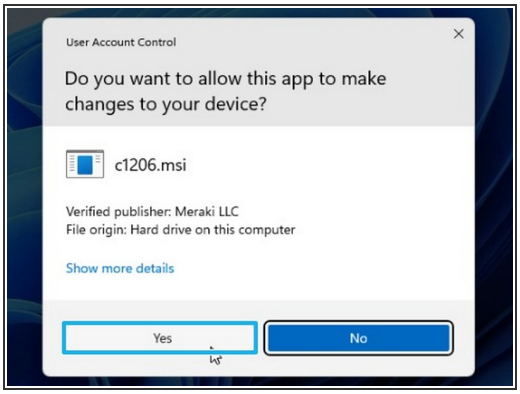

Step 14

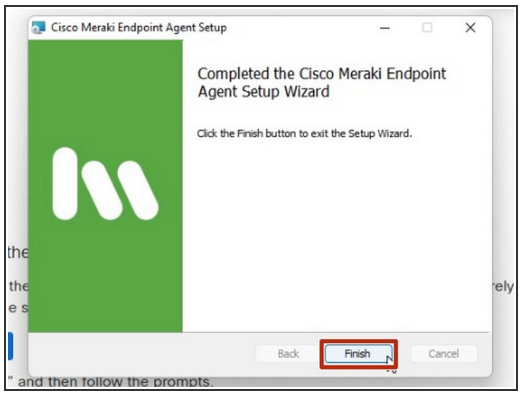

- Enter the Network ID: **T2flex**
- Click **Next**

Step 15

- Click **Install**

Windows Security will ask for permission to make changes.

- Click **Yes**

Once the Meraki setup is complete:

- Click **Finish**

Please leave your computer powered on for the next 24 hours, so all of the required applications can be installed remotely, in the background.
