# INTRODUCTION

This guide will walk you through unboxing your Lenovo ThinkVision Monitors and demonstrate how to maintain the packaging materials incase it needs to be sent back to T2.

## Step 1 — Lenovo ThinkVision Monitor - Unboxing

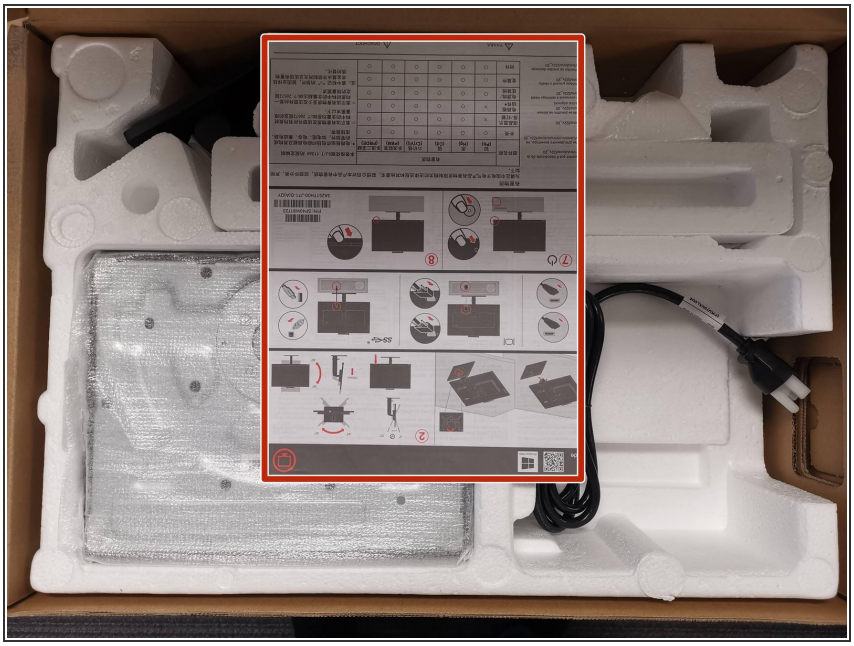

⚠ Be sure to open your monitors right side up, and be careful when using a sharp blade.

- **Cut the tape** on the top of the box

**Lay the box down.**

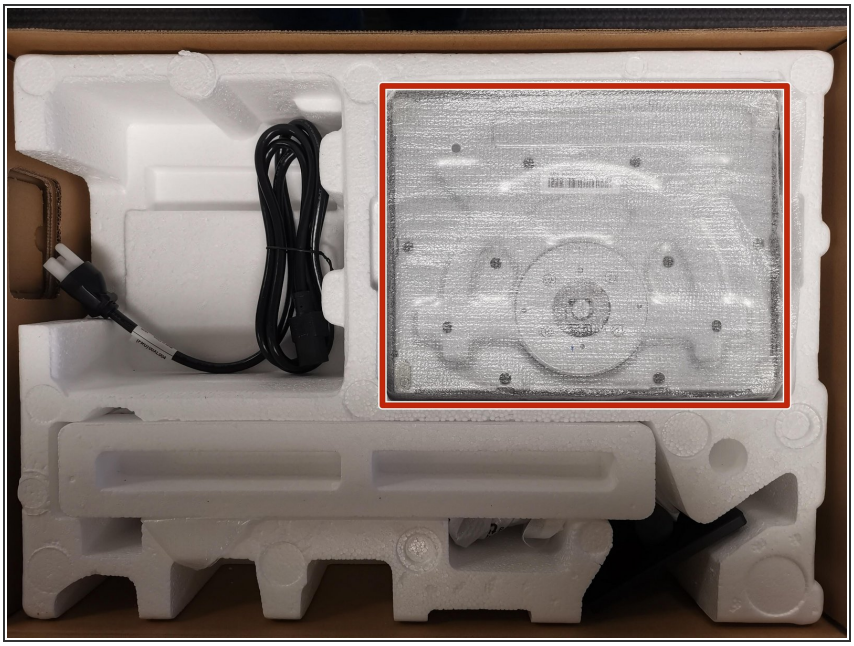

- **Pull and lift the top open**

## Step 2

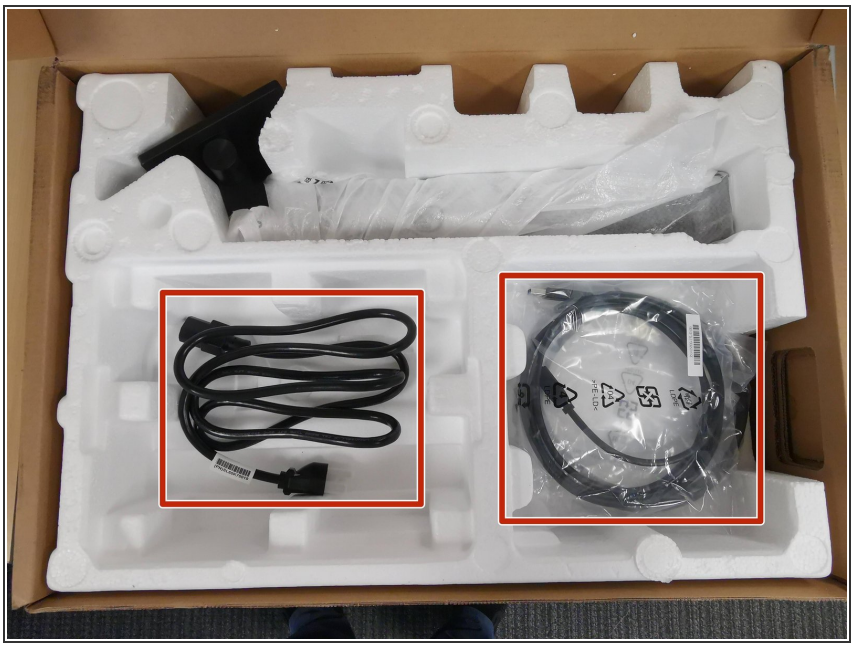

- Remove the **Quick Start Guide**

## Step 3

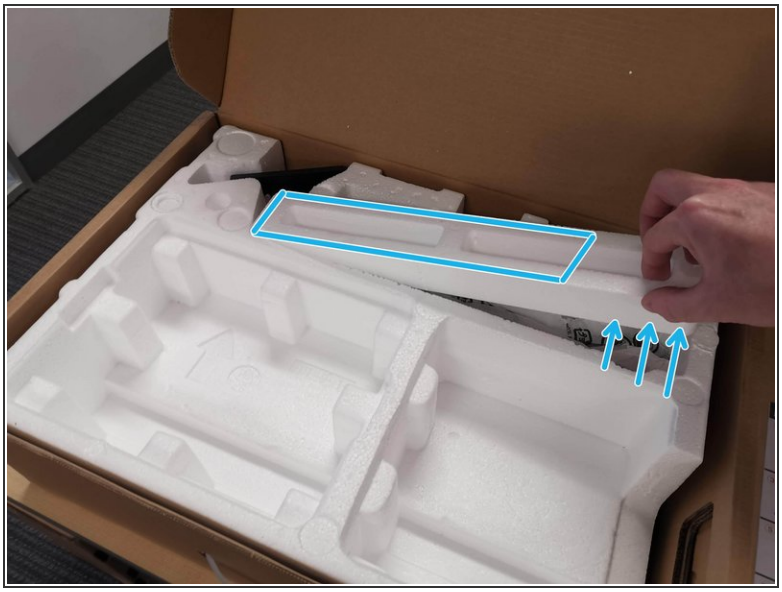

- Remove the **Monitor Base**

## Step 4

- Remove the **Cables**

## Step 5

- Remove the **Monitor Arm Styrofoam**
- Remove the **Monitor Arm**

## Step 6

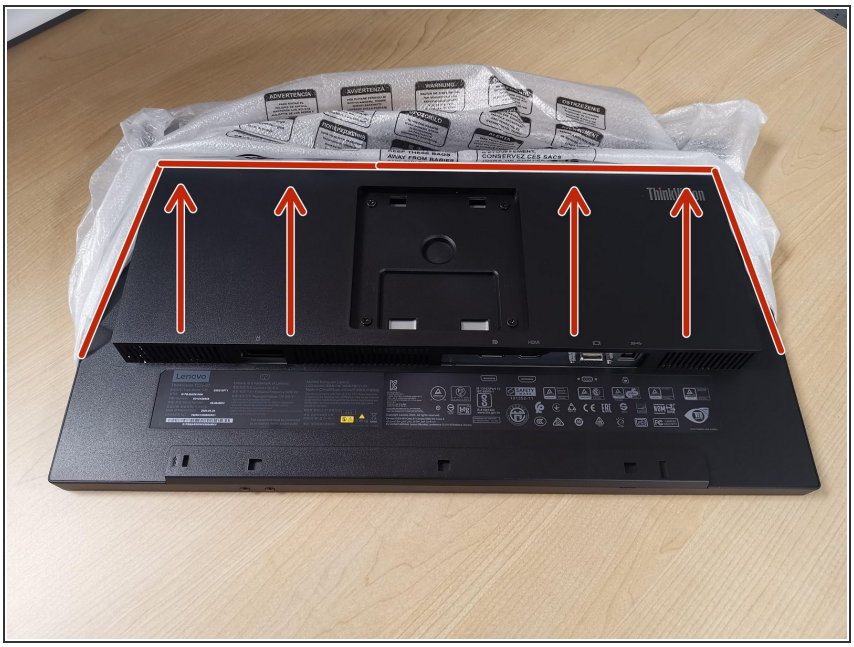

- Be sure to have enough space to set up all items. Lay all components out to ensure a simple setup.
- Lift the **Styrofoam** out of the box

## Step 7

- Carefully, grab one side of the monitor.
- Lift the **Monitor** out of the box
- Once the monitor is lifted, use both hands to remove it from the box.

## Step 8

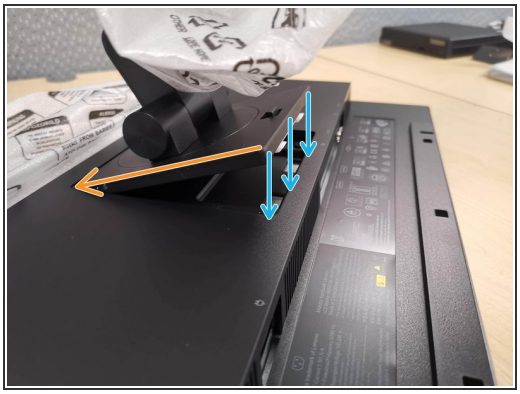

With the monitor facing down:

- **Lift up the back of the screen cover**

⚠ Be careful not to tear the cover. If it begins to tear, slide the front of the cover up.

## Step 9

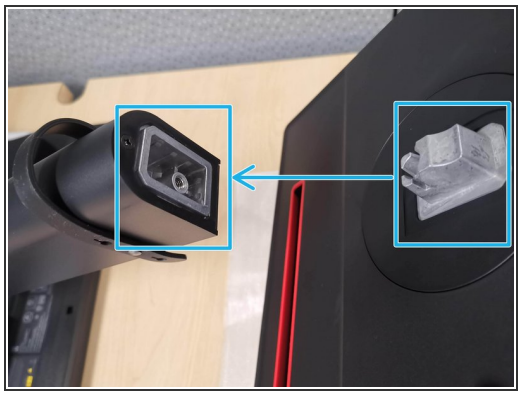

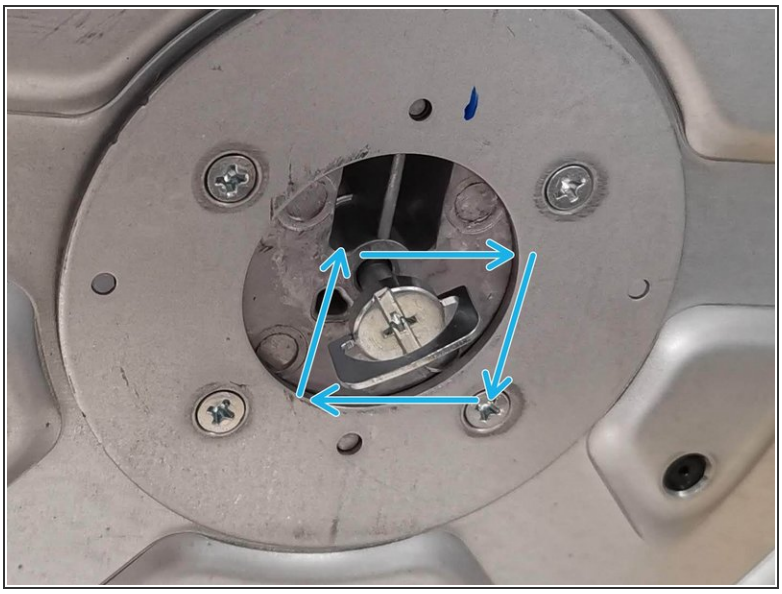

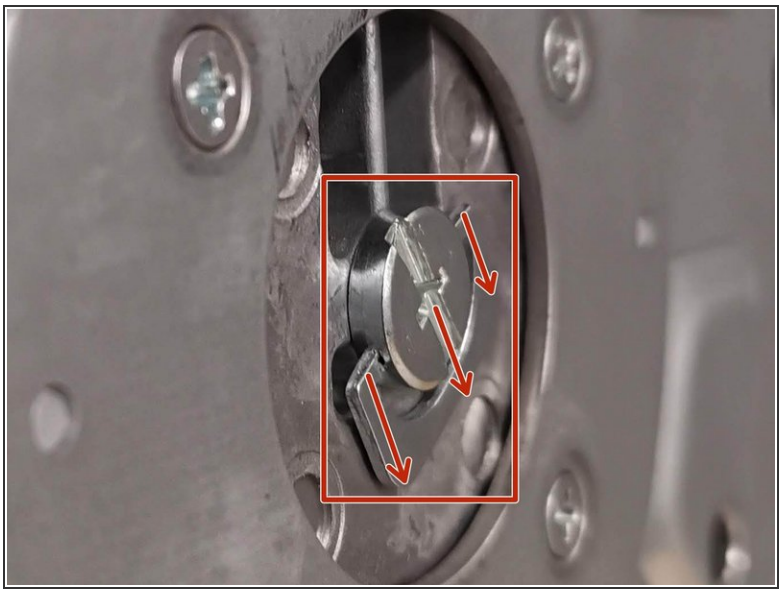

- **Tilt and slide the Monitor Arm** into the bracket
- **Lay the arm flush**, it will lock into place
- Remove the **cover from the arm**

## Step 10

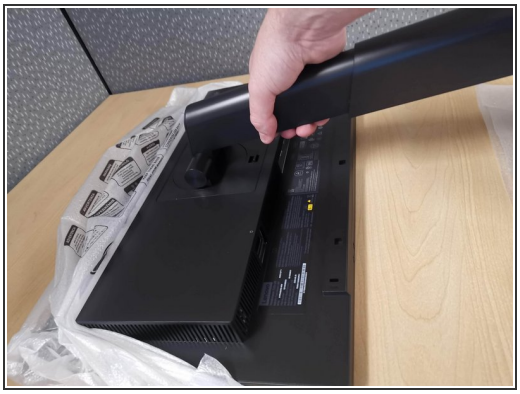

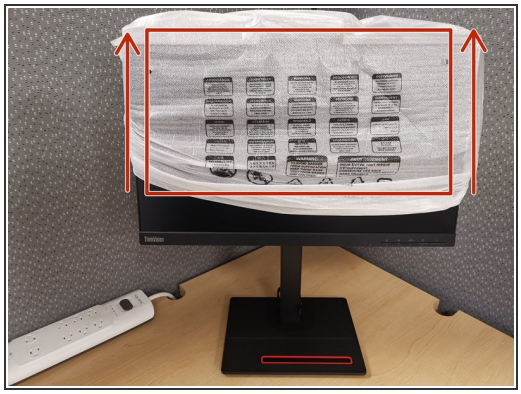

- Unwrap the **Monitor Base**
- Line-up the **Arm with the Base**
- Push the **Base flush with the Arm**

## Step 11

- **Turn the base screw clock wise**
- Once it is tight, **flatten the screw**

## Step 12

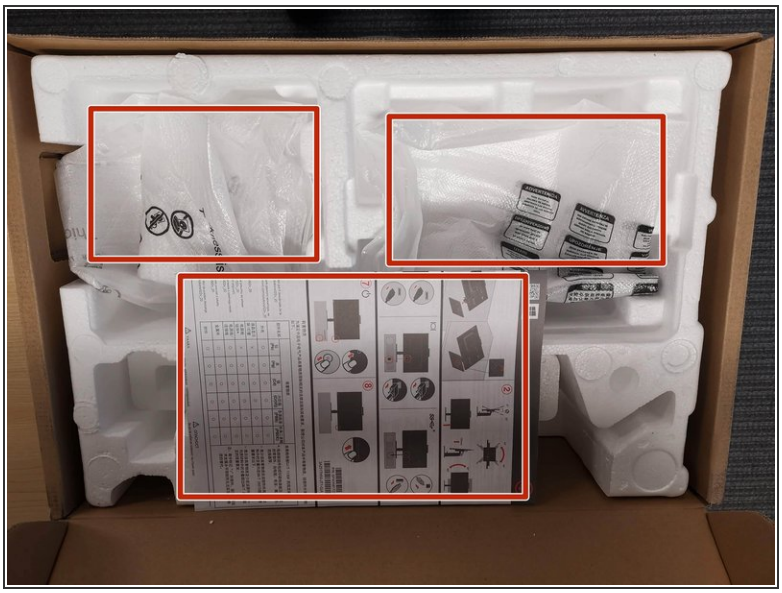

*When moving your monitor, grab it by the arm.* **Stand the monitor upright.**

- **Remove the monitor cover**

Keep the covers and bags organized.

## Step 13

- **Place the Styrofoam** back in the box
- Put the **Quick Start Guide, covers and bags** back in the box

## Step 14

⚠ Repeat steps 1 - 13 to unbox your secondary monitor.

ⓘ *Only your primary monitor has a camera.*

ⓘ Be sure to have enough space to set up all items. Lay all components out to ensure a simple setup.

ⓘ ***A Surge Protector is recommended, and should be used to prevent damage to your equipment.***
