Lenovo ThinkVision Monitor - Unboxing

Written By: Brendon Welch

INTRODUCTION

This guide will walk you through unboxing your Lenovo ThinkVision Monitors and demonstrate how to maintain the packaging materials incase it needs to be sent back to T2.

Step 1 — Lenovo ThinkVision Monitor - Unboxing

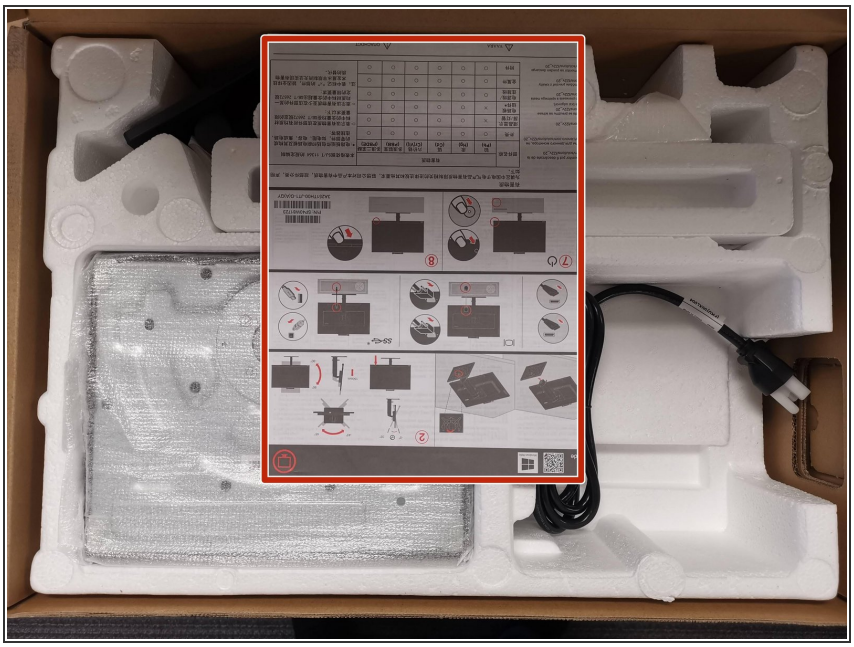

⚠ Be sure to open your monitors right side up, and be careful when using a sharp blade.

- **Cut the tape** on the top of the box

Lay the box down.

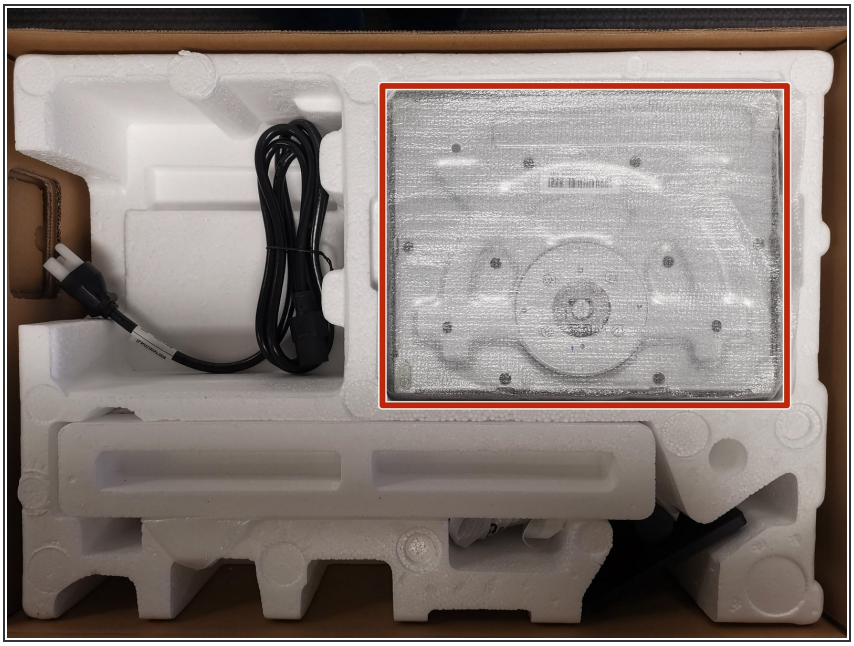

- **Pull and lift the top open**

Step 2

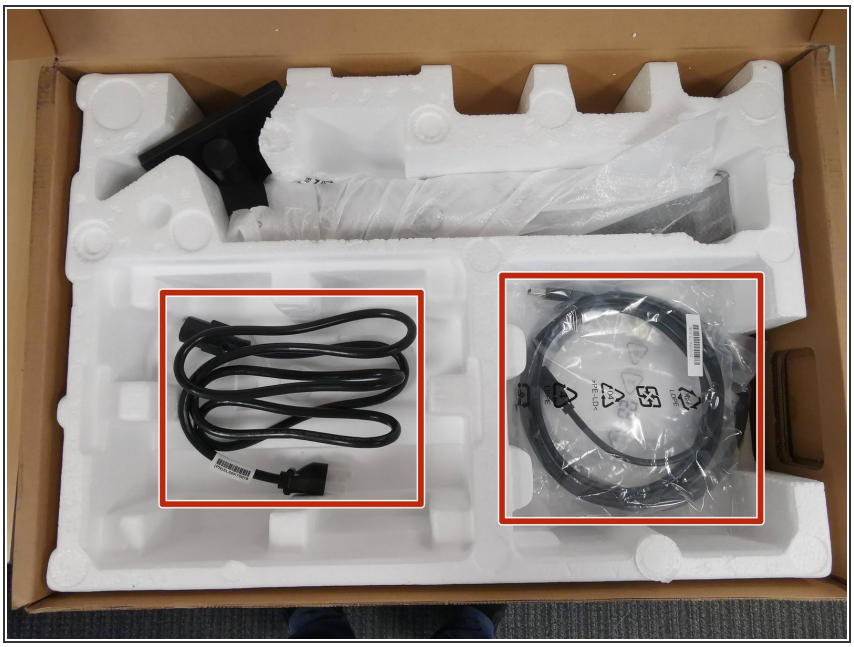

- Remove the **Quick Start Guide**

Step 3

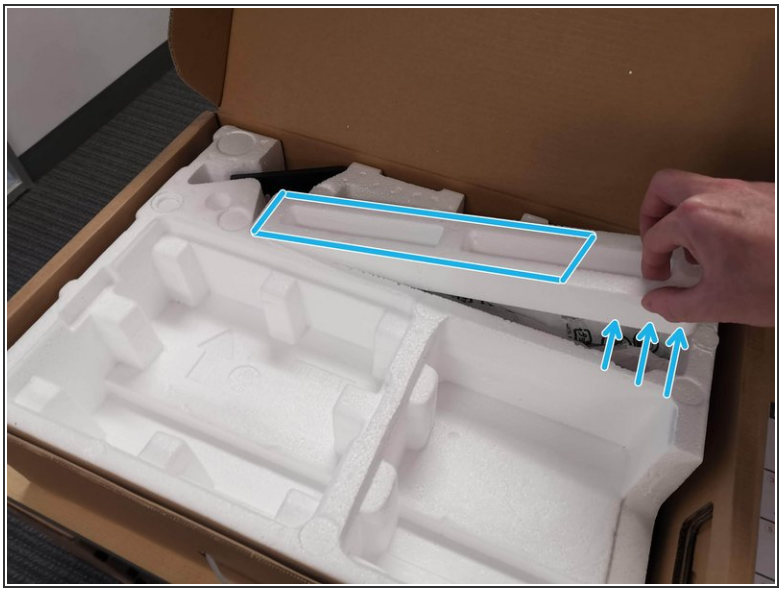

- Remove the **Monitor Base**

Step 4

- Remove the **Cables**

Step 5

- Remove the **Monitor Arm Styrofoam**
- Remove the **Monitor Arm**

Step 6

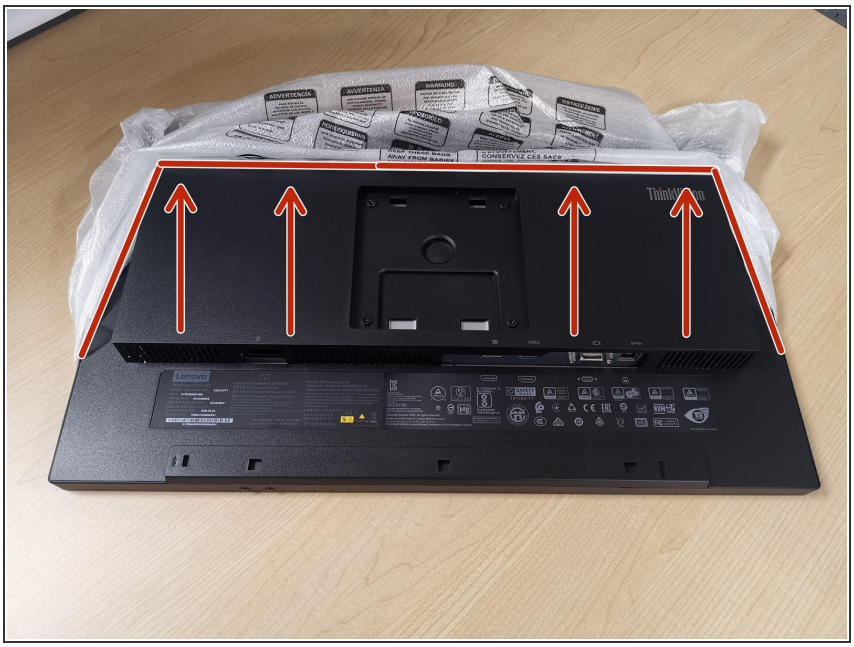

- Be sure to have enough space to set up all items. Lay all components out to ensure a simple setup.
- Lift the **Styrofoam** out of the box

Step 7

- Carefully, grab one side of the monitor.
- Lift the **Monitor** out of the box
- Once the monitor is lifted, use both hands to remove it from the box.

Step 8

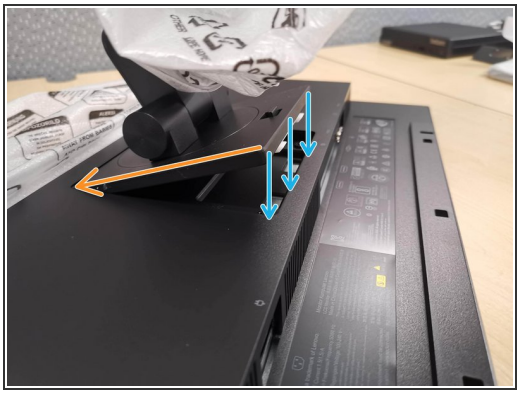

With the monitor facing down:

- **Lift up the back of the screen cover**

⚠ Be careful not to tear the cover. If it begins to tear, slide the front of the cover up.

Step 9

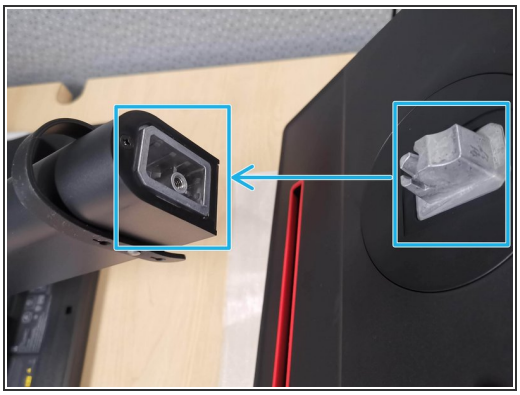

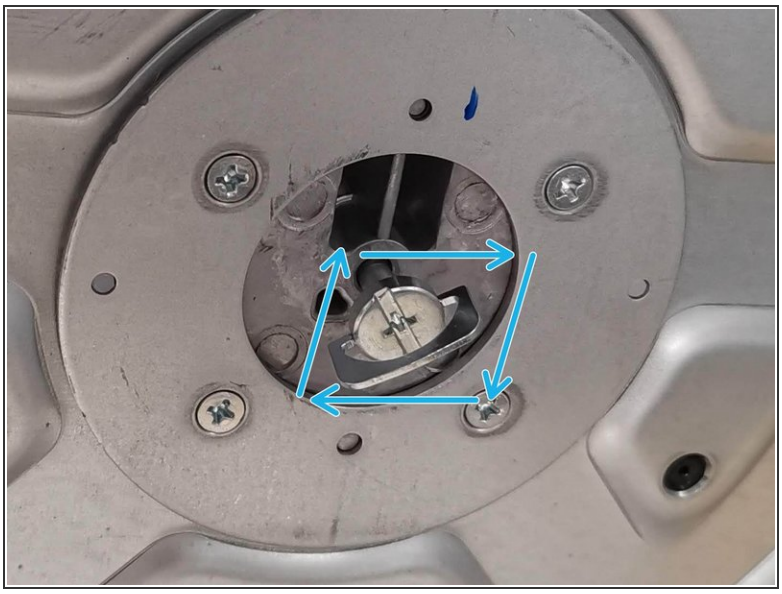

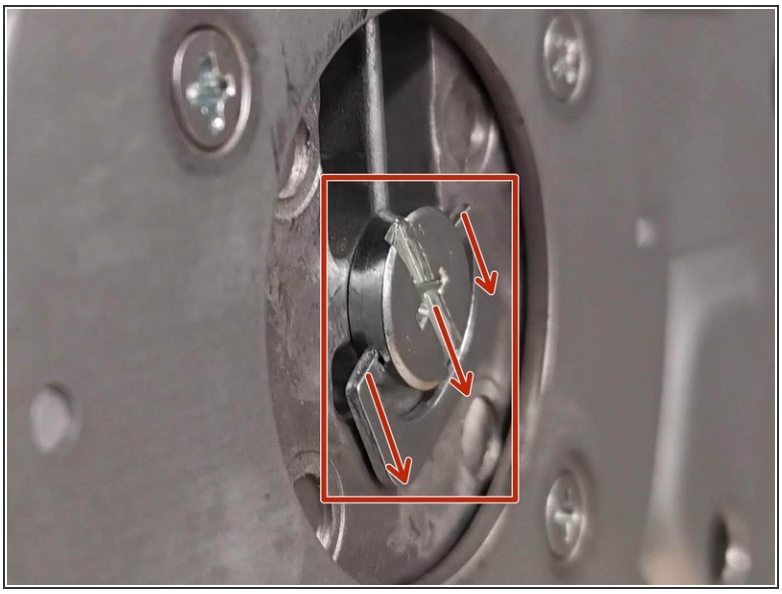

- **Tilt and slide the Monitor Arm** into the bracket
- **Lay the arm flush**, it will lock into place
- Remove the **cover from the arm**

Step 10

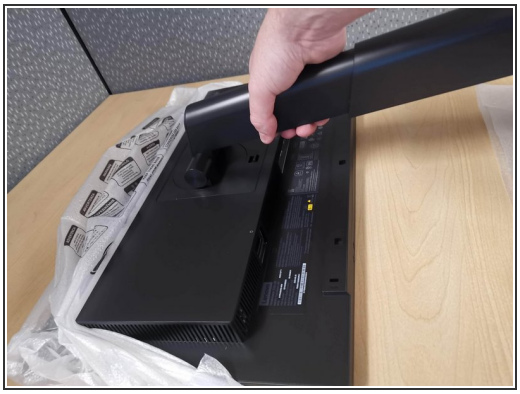

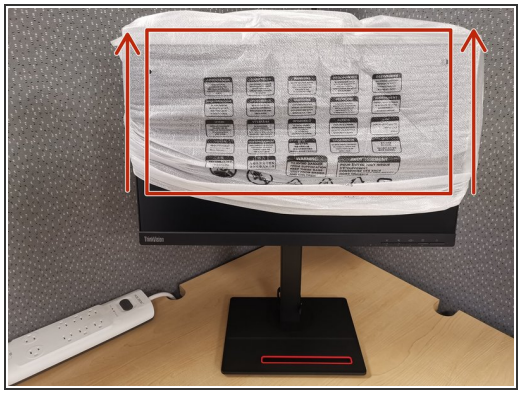

- Unwrap the **Monitor Base**
- Line-up the **Arm with the Base**
- Push the **Base flush with the Arm**

Step 11

- **Turn the base screw clock wise**
- Once it is tight, **flatten the screw**

Step 12

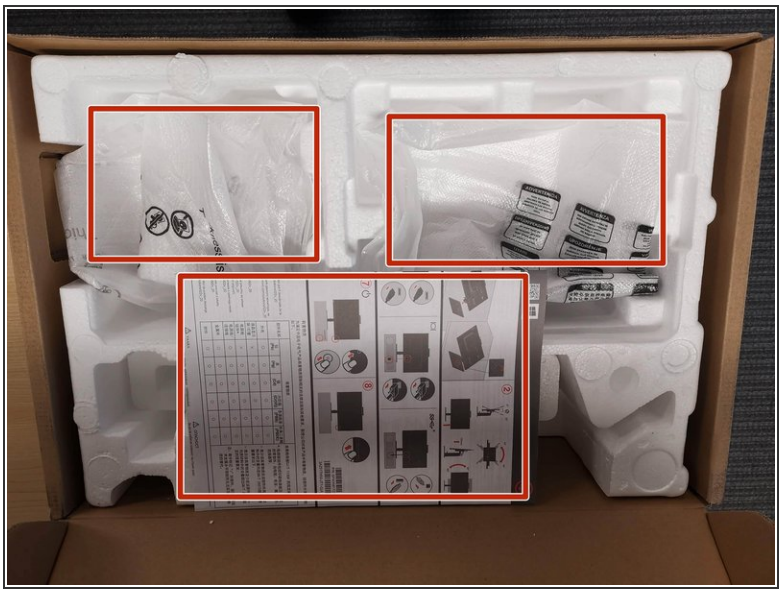

When moving your monitor, grab it by the arm. **Stand the monitor upright.**

- **Remove the monitor cover**

Keep the covers and bags organized.

Step 13

- **Place the Styrofoam** back in the box
- Put the **Quick Start Guide, covers and bags** back in the box

Step 14

⚠ Repeat steps 1 - 13 to unbox your secondary monitor.

ⓘ *Only your primary monitor has a camera.*

ⓘ Be sure to have enough space to set up all items. Lay all components out to ensure a simple setup.

ⓘ ***A Surge Protector is recommended, and should be used to prevent damage to your equipment.***
