Connecting your Mini PC and Monitors

Written By: Brendon Welch

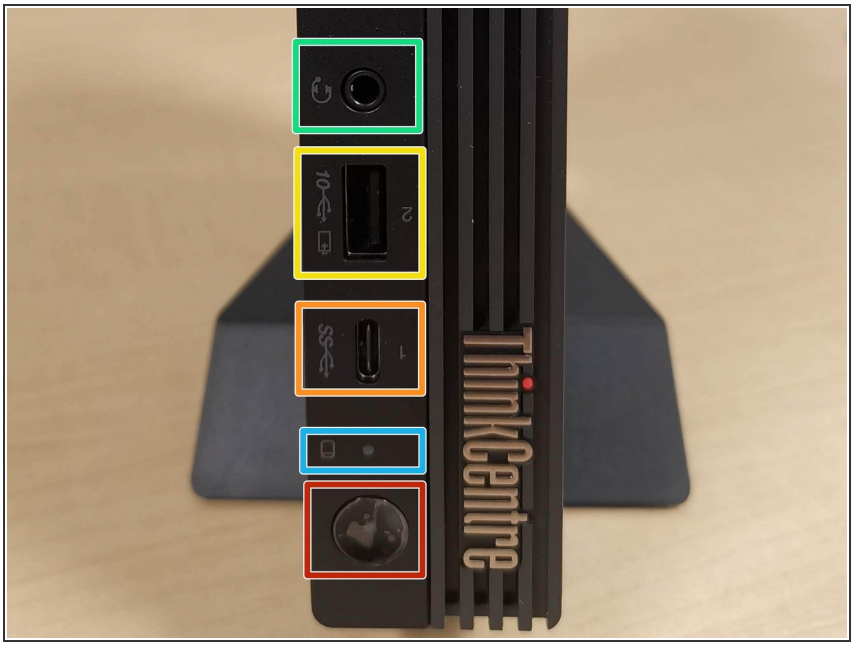

Step 1 — Connecting your Mini PC and Monitors

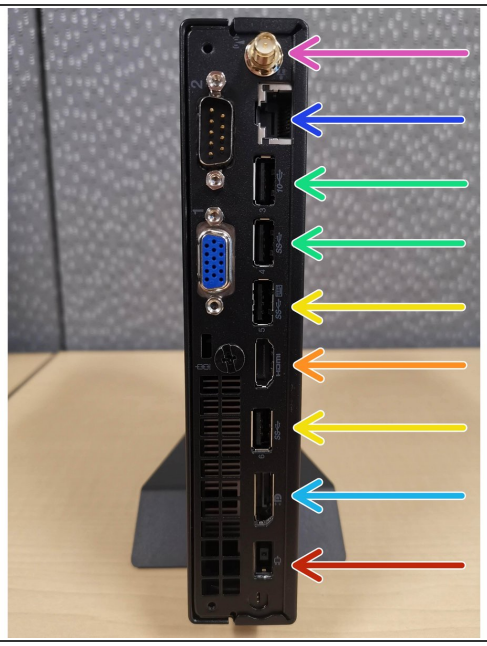

- Place your **Mini PC in the stand**

Step 2

- **Front Panel Overview:**
- **Headphones/Headset**
- **USB 3.0** (Highspeed)
- **USB 3.0 Type C** (Highspeed)
- **Hard Drive Activity Light**
- **Power Button**

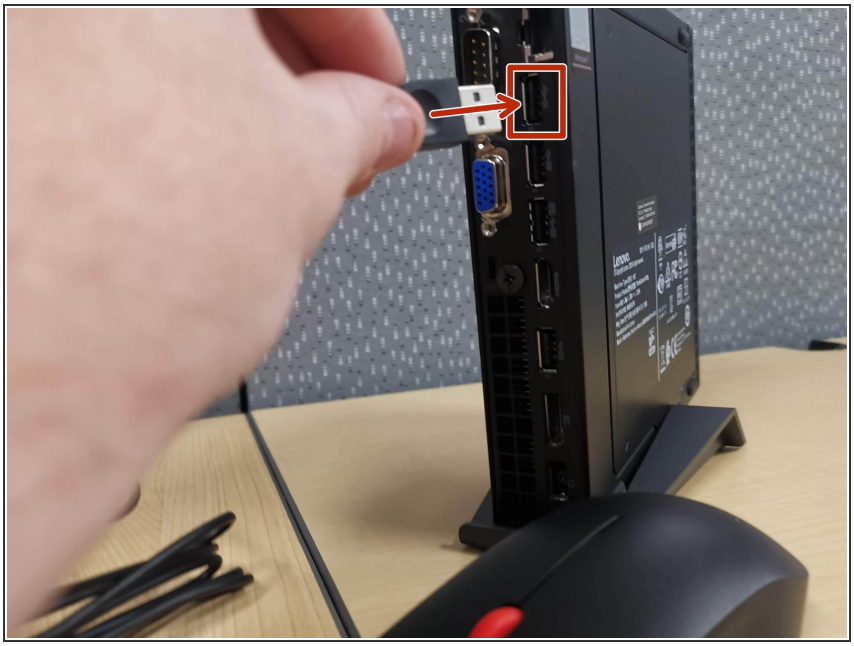

Step 3

ⓘ **Rear Panel Overview:**

- **Wi-Fi Antenna Jack**
- **Ethernet Port**
- **USB 2.0**
- **USB 3.0** (Highspeed)
- **HDMI**
- **DisplayPort**
- **Power Supply**

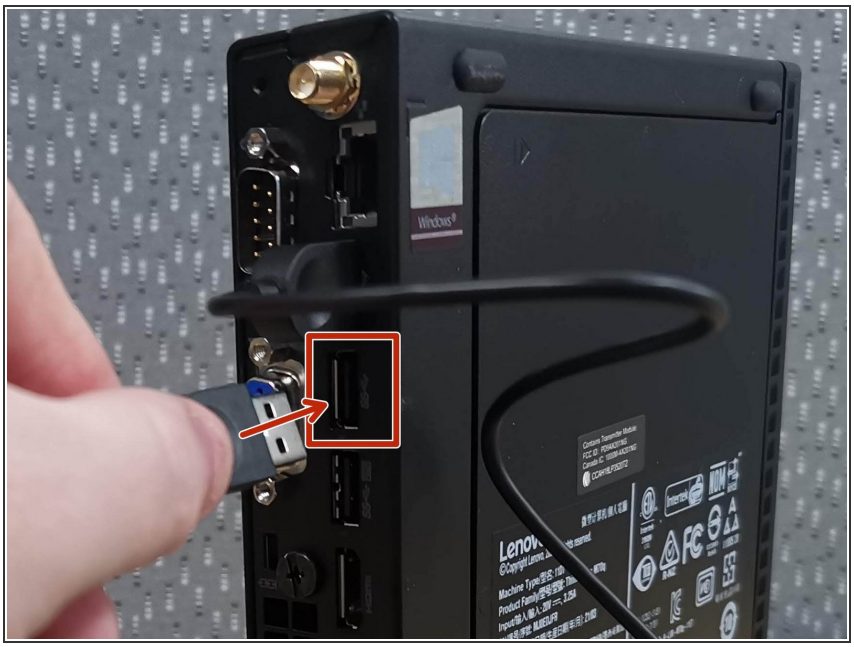

Step 4

⚠ Do not force any cables into place.

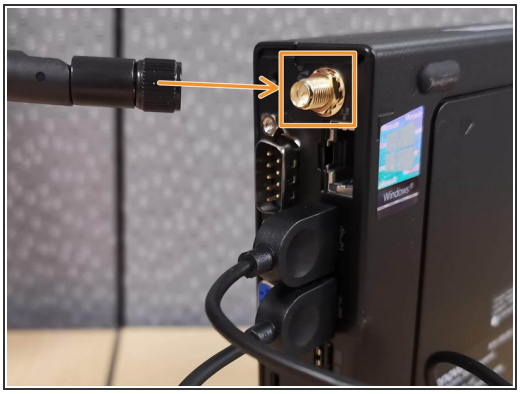

- Plug your **Mouse into the top USB port**

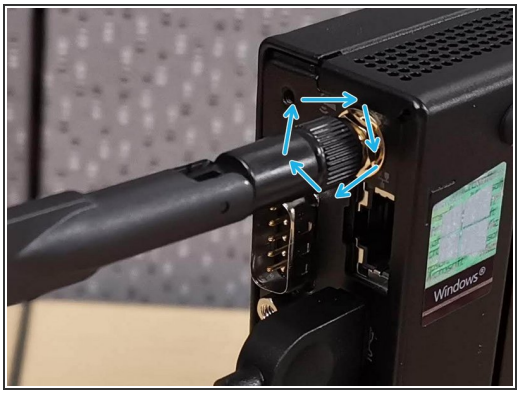

Step 5

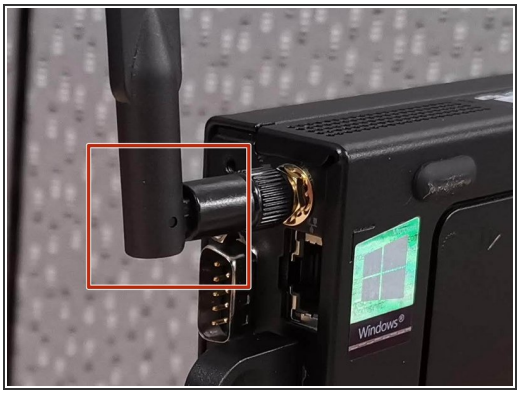

- Plug your **Keyboard into the USB port below the mouse**

Step 6

- Plug the **Wi-Fi Antenna into the jack**
- Twist the end of the **Wi-Fi Antenna clock wise to secure it**
- Angle the **Wi-Fi Antenna** to enhance the signal

Step 7

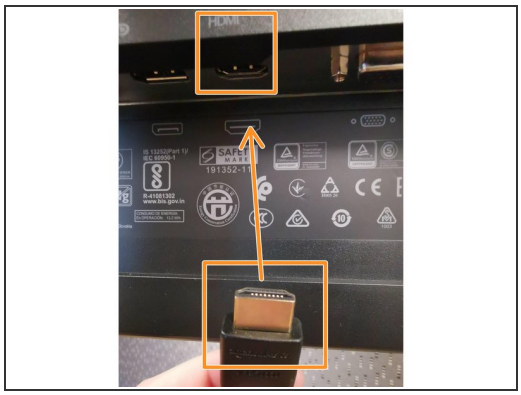

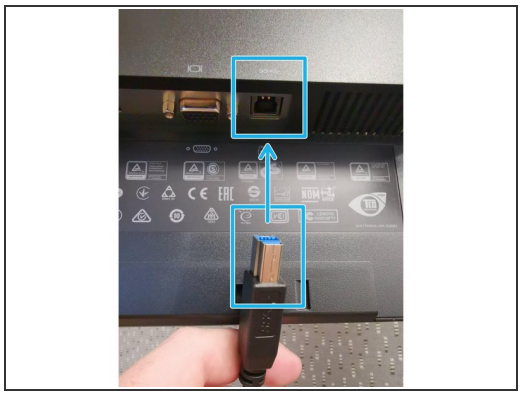

Each of your monitors will come with a Display Port cable and an USB 3.0 cable.

The HDMI cable is provided separately. If you did not receive one, contact your hiring manager.

- Unwrap the **Display Port and USB 3.0 cables**
- **HDMI Cable**

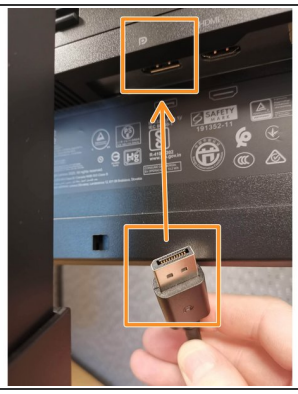

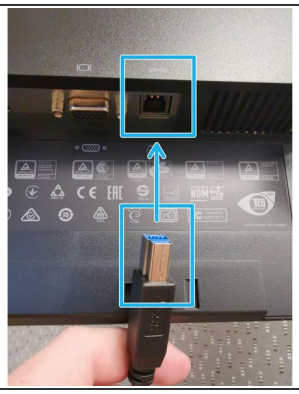

Step 8

⚠ Do not force any cables into place.

- Connect the **HDMI cable to the back of the monitor**
- Connect the **USB 3.0 cable to the back of the monitor**
- Connect the **Power cable to the back of the monitor**

Step 9

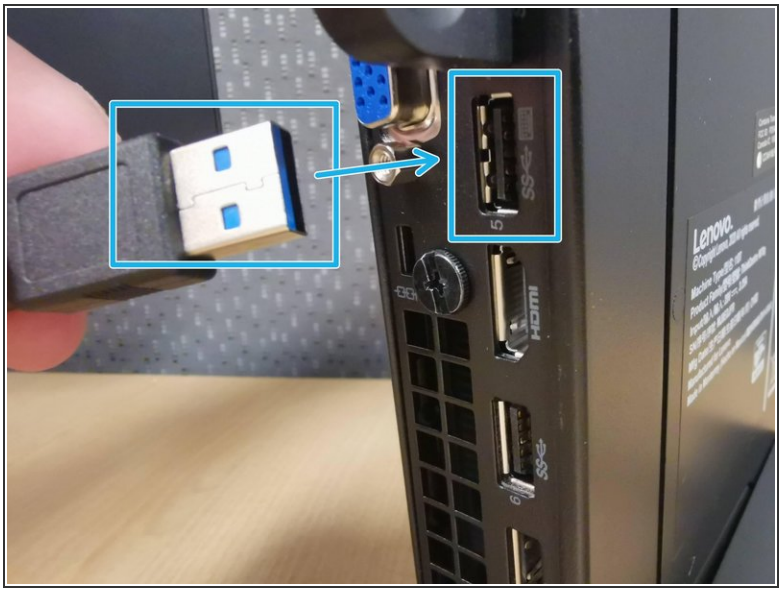

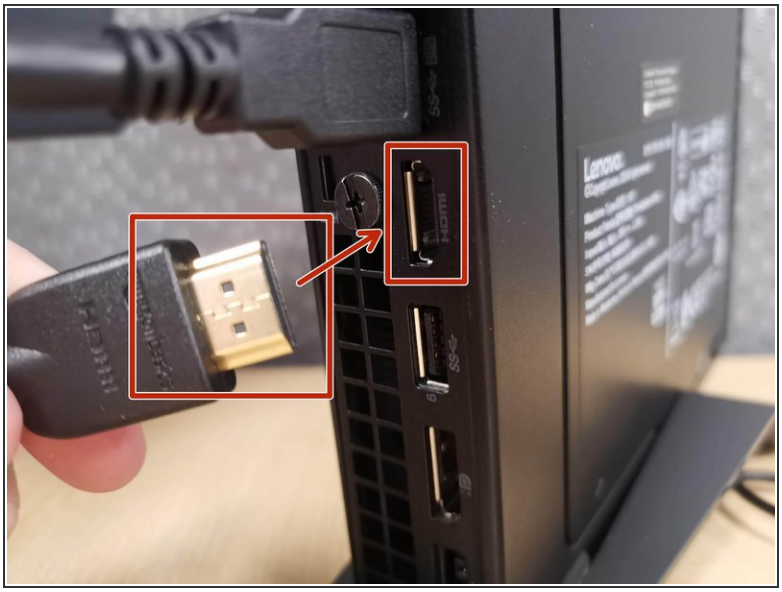

- **Repeat Step 8 for your secondary monitor. Instead of using HDMI, the secondary monitor will use the Display Port connection.**

⚠ Do not force any cables into place.

- Connect the **Display Port cable to the back of the monitor**
- Connect the **USB 3.0 cable to the back of the monitor**
- Connect the **Power cable to the back of the monitor**

Step 10

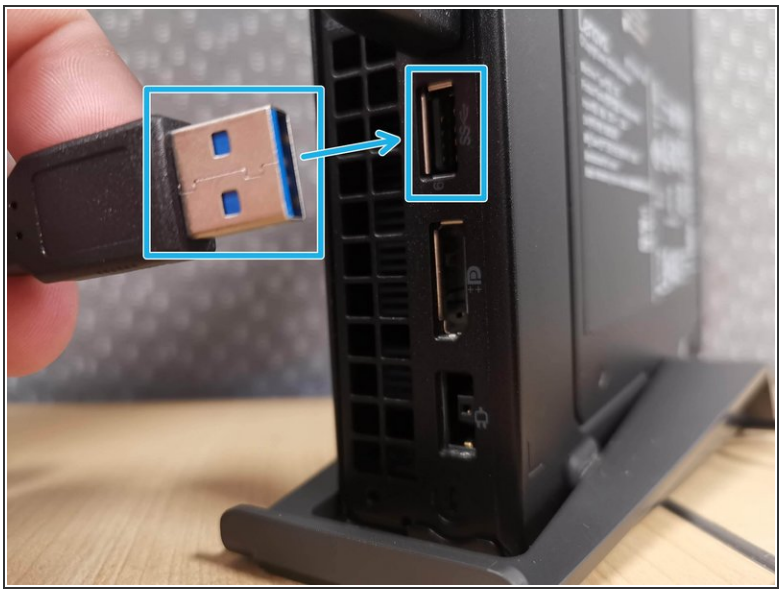

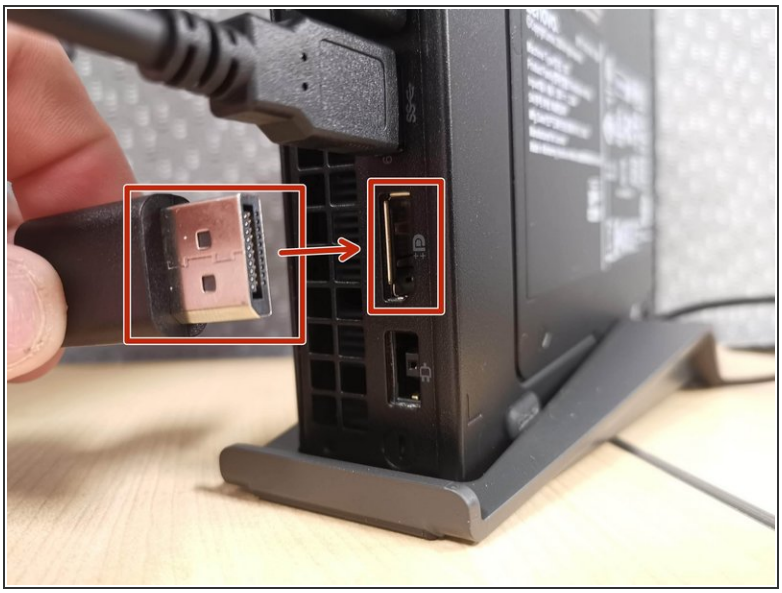

⚠ Do not force any cables into place.

The primary monitor uses the HDMI connection.

- Connect the **USB 3.0 cable to the Mini PC**
- Connect the **HDMI cable to the Mini PC**

Step 11

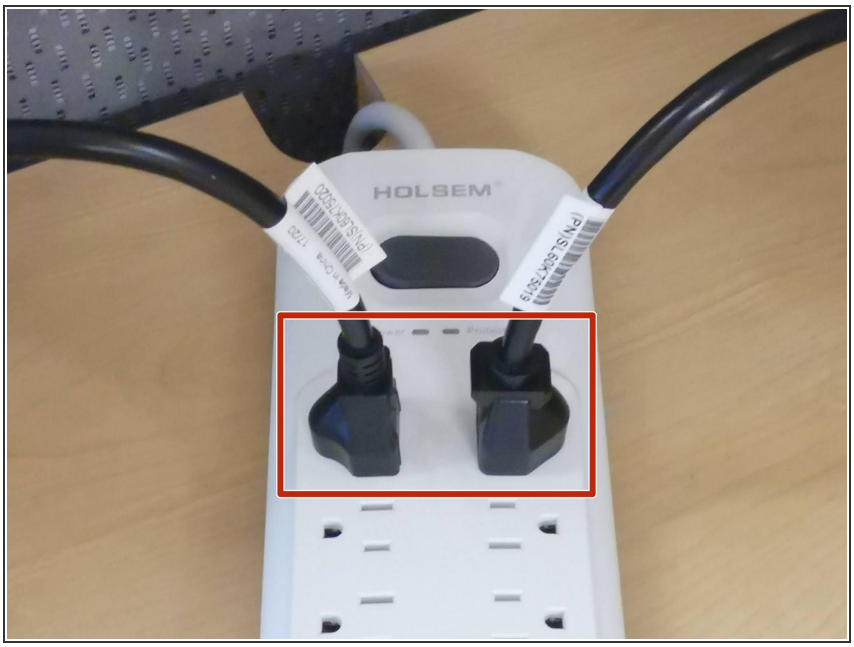

⚠ Do not force any cables into place.

The secondary monitor uses the Display Port connection.

- Connect the **USB 3.0 cable to the Mini PC**
- Connect the **Display Port cable to the Mini PC**

Step 12

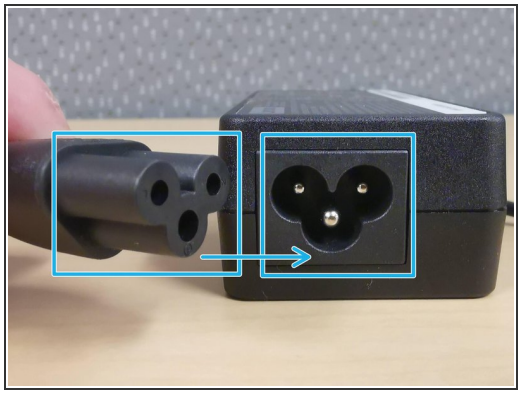

⚠ Make sure your surge protector is turned OFF.

- Connect the **monitors' power cable to the surge protector**

Step 13

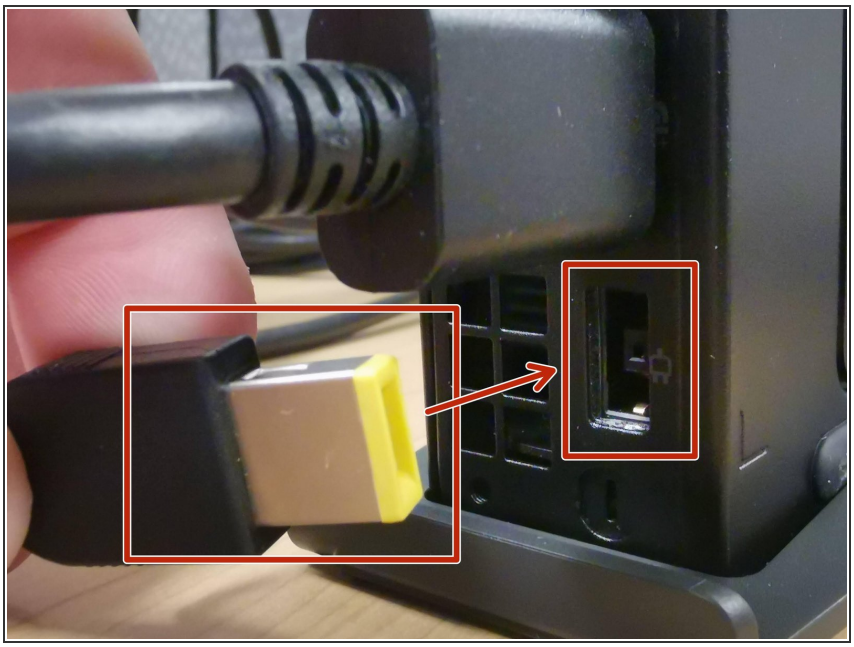

- Assemble the Mini PC power supply:
- Connect the **AC cable to the Mini PC power supply**
- Connect the **AC cable to the surge protector**

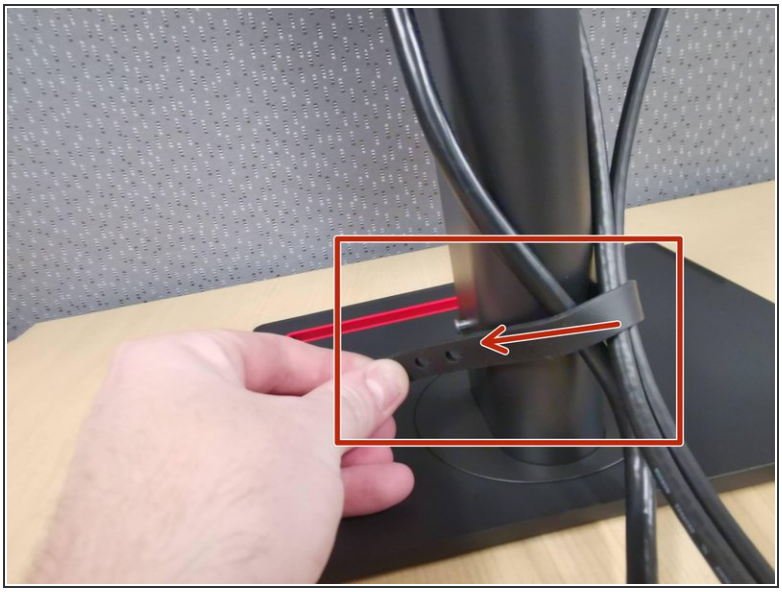

Step 14

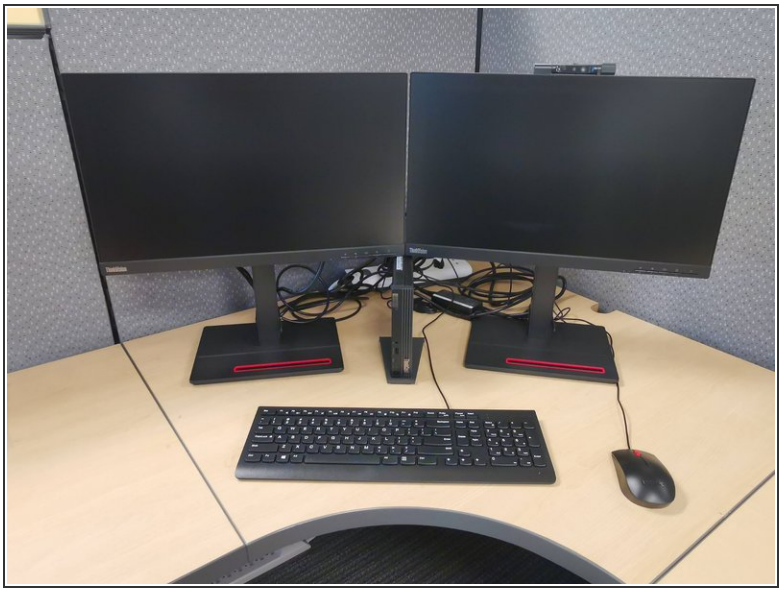

⚠ Do not force any cables into place.

- **Connect the Mini PC power supply**

Step 15

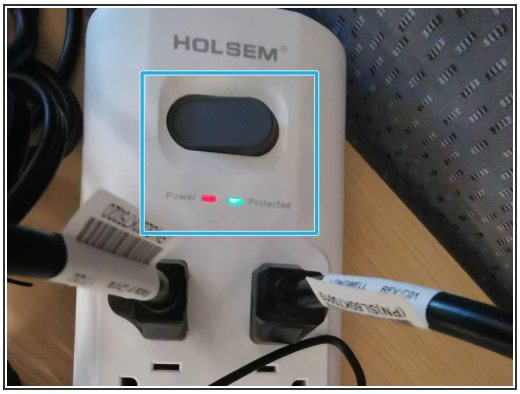

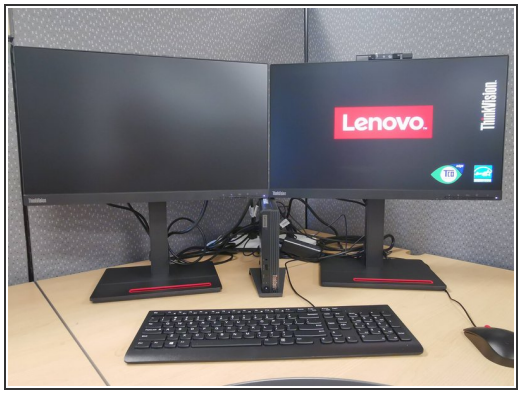

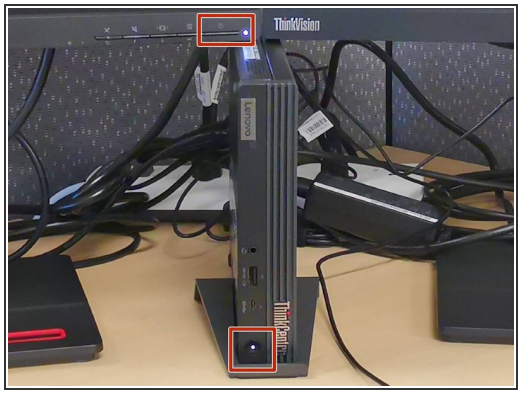

- **Organize your cables** using the strap at the base of the monitor arm

Arrange your monitors, PC, keyboard and mouse into a comfortable position.

Step 16

- **Turn the Surge Protector on**

ⓘ The Mini PC and monitors will turn on.

⚠ **If the Mini PC or monitors do not turn on:**

- Press **Power on the Mini PC and monitors**
