Making an Outbound Call

Written By: Brendon Welch

Step 1 — Making an Outbound Call

⚠ In order to dial out, you must enter **81** before the ten digit phone number.

ⓘ **Example:** *817145832100*

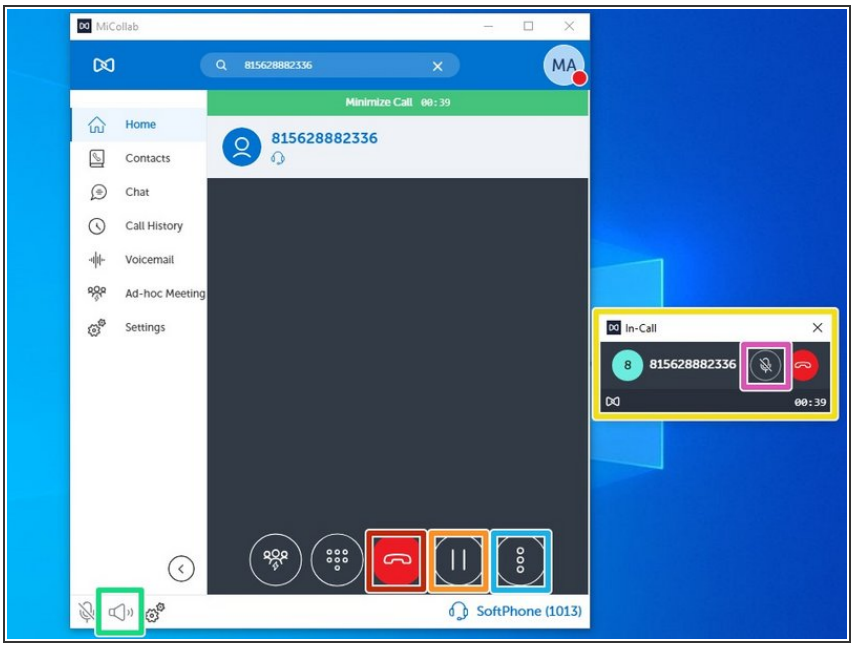

ⓘ Notice that **81** is added to **(714)583-2100**. No other symbols or spaces are needed.

- Enter the phone number in the **Search or Dial** field
- Click **Make call**

Only when making your first outbound call, Windows Defender will prompt you to allow access.

- Click **Allow access**

Step 2

*Refer to this **Key** to control your calls.*

- **In Call Pop-Up**
- **Headset Volume**
- **Mute / Unmute**
- **Hold**
- **Consult / Transfer**
- **Hang Up**
