TMC - How to Replace a Memory Option SSD 256GB

Written By: Fataimoemanu Tohi

Step 1 — How to Replace a 31508 Memory SSD 256 GB

⚠ Turn off the power to the machine!

- Remove the 8 screws on the Pendant casing.
- On the programming panel unplug the cable wires from the Motherboard.
- Remove the 4 screws that mount the SSD to the bracket.
- On the bottom of the bracket remove the 4 screws.
- Install the replacement part.
- Perform steps in reverse order.
