# Nikon Ti2-E (Balgrist) - Managing Optical Configurations (OCs)

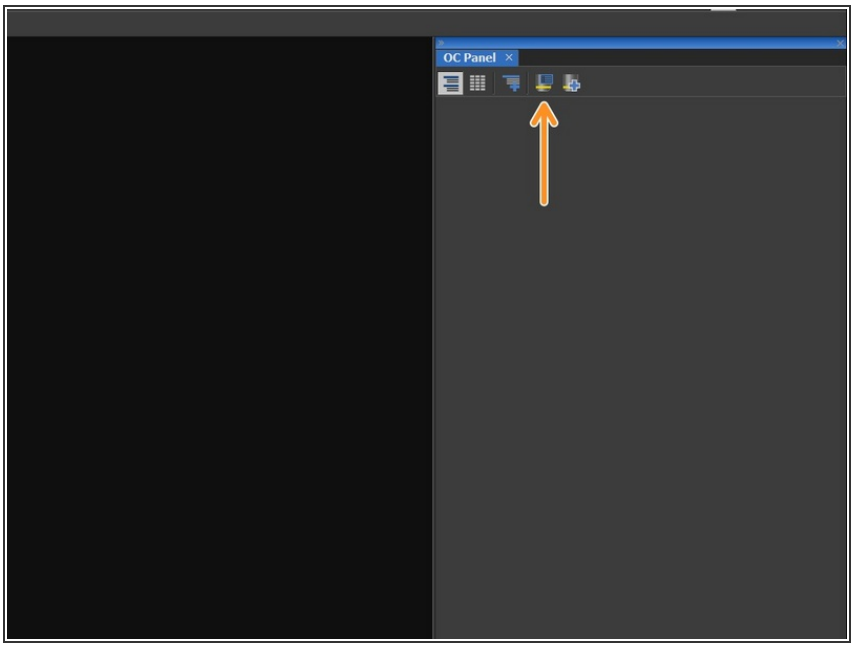

Written By: z mbstaff

# INTRODUCTION

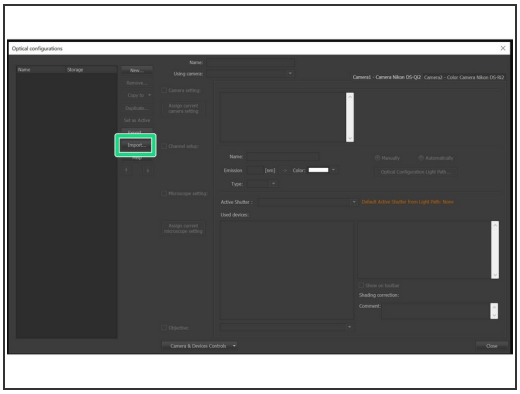

This guide will show you how to load the Optical Configurations (OCs).

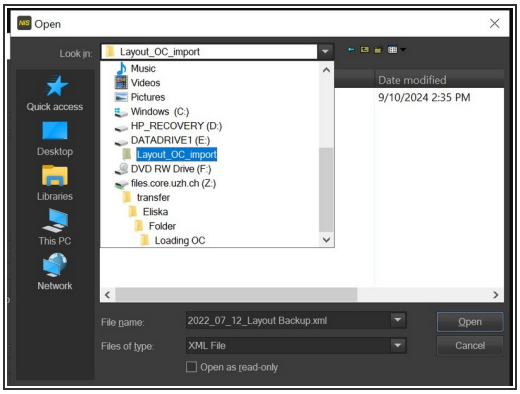

## Step 1 — OC panel

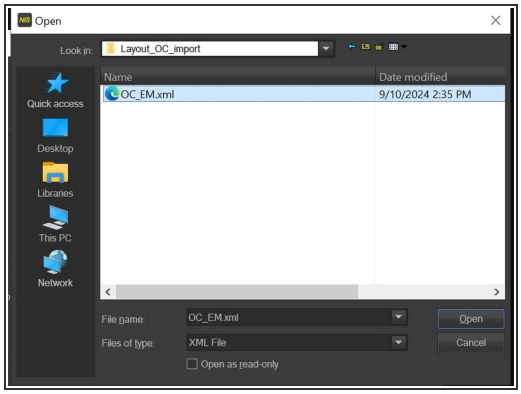

- In the OC panel, click on the ***Explore Optical configurations*** (or use the shortcut *CTRL + N*)

## Step 2 — Import OCs

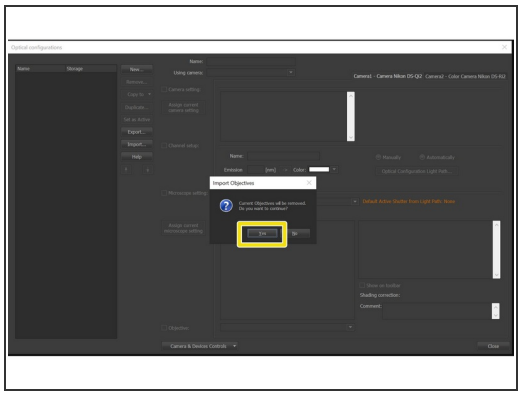

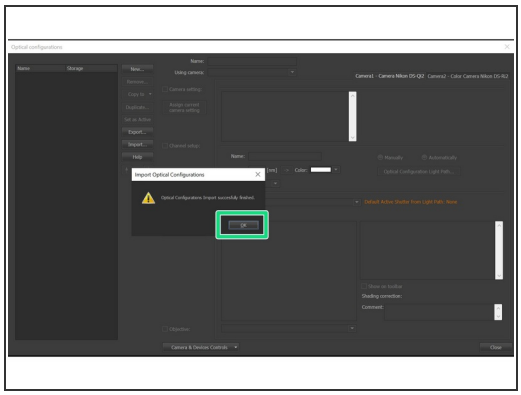

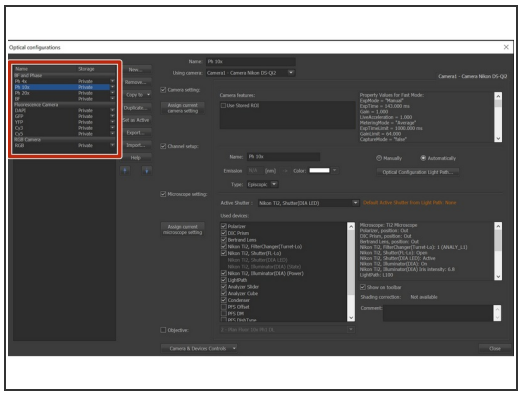

- Click on the ***Import***
- Open the document ***20260707 OC after remote.xml***. Saved on the *DATADRIVE1 (E:)* /ZMB

**This document was generated on 2026-07-20 01:21:12 PM (MST).**

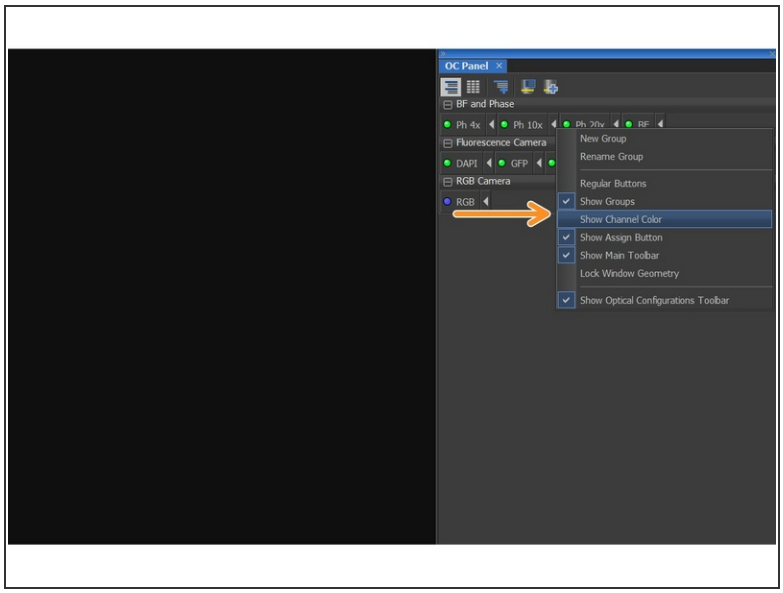

## Step 3 — Confirm

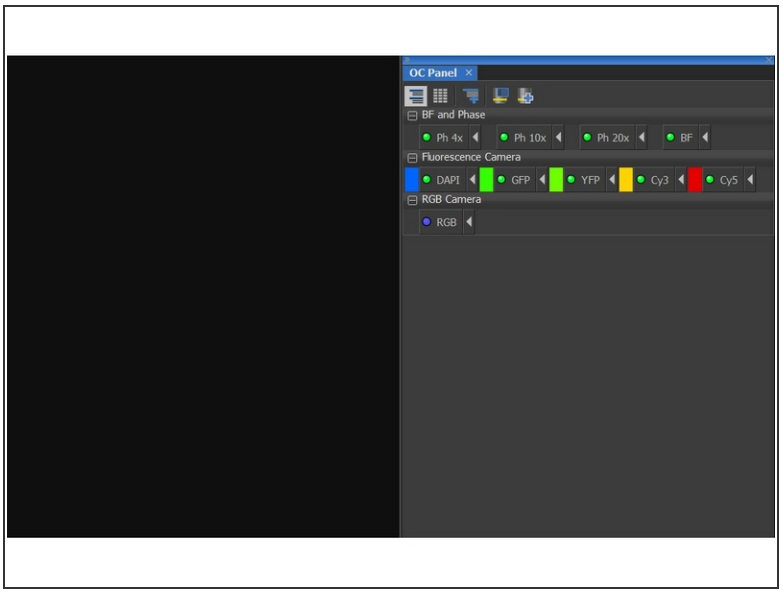

- Click ***Yes*** when you will be asked to import objectives.
- Click ***OK***
- The configurations appear at the top left corner.

  ⓘ *Private* OCs means that these OCs are linked to your account. Every change in the OCs will be only within your account.

## Step 4 — Optional

- To be more colorful, you can rightclick anywhere on the OC panel and click on *Show Channel Color*
