Step 1 — Log off

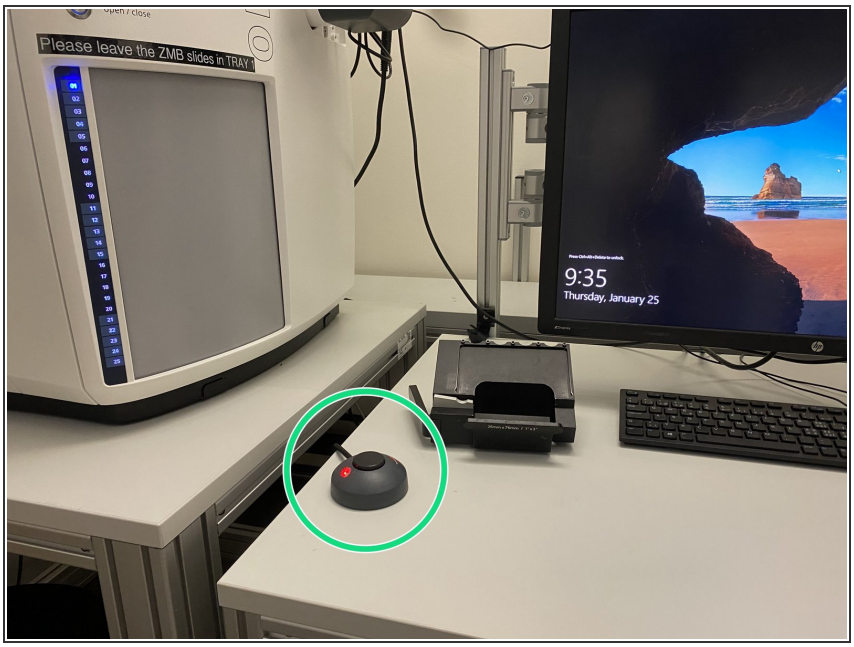

- ⓘ Make sure you have saved your data and deployed it for transfer (guide here)
- Ensure to unload your samples, in the case they are still loaded, by clicking "unload tray"
- Then you can close the software
- ⓘ It might ask you if you want to save changed profiles, which by now should be saved. Thus, you can click no and ignore
- If no user has the system booked within the next two hours, you can proceed to shut down the system, otherwise you can just logg off the computer
- Once the software is closed, you can turn off the PC by clicking the "Shut down" icon on the desktop
- Click the off power button on the side of the scanner
- ⚠ BEFORE CONTINUING THE PC AND SCANNER MUST BE COMPLETELY OFF ON THEIR OWN

Step 2 — Final Turn Off

- After the PC and the scanner turn off, you can press the main power button off
- Best of luck with your images
